

Multi-Layered Protection Is Your Best Cyber Defense

Threat Landscape

Attacks Are Multifaceted

- Attackers exploit client-side/server-side applications
- Poorly coded middleware applications/SaaS can expose your company
- Hackers will infiltrate loosely applied access privileges to applications & data

Your Cyber Defense Should Be Multilayered

Thwart attacks

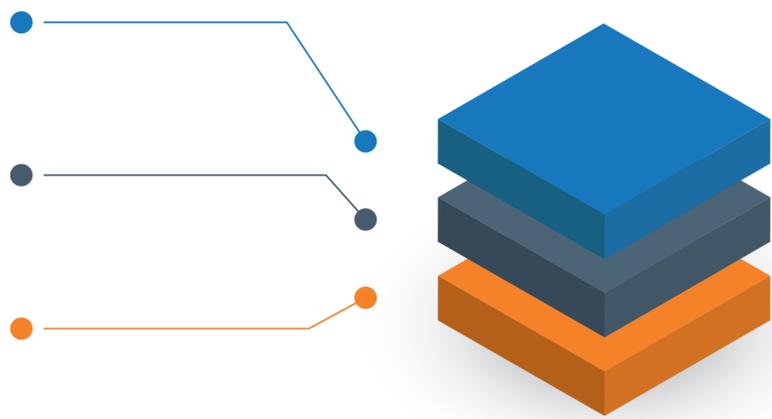

Through security governance and intrusion prevention systems/next-generation firewalls

Resolve attacks more quickly

Through security information and event management (SIEM) solutions

Minimize damage

Through stronger data protection enabled by encryption, and reduce vulnerabilities with application security

Security You Can Trust from Hewlett Packard Enterprise

- Log and Event Management and SIEM solutions with HPE ArcSight
- Application Security and Vulnerability Scanning with HPE Fortify
- Network Defense and Advanced Threat Detection with HPE TippingPoint & ATA
- Encryption and Payments Security with HPE Atalla and Voltage Security

ConRes – Your Partner in Cyber Security

- ✓ Hewlett Packard Enterprise Platinum Partner
- ✓ 50 years of experience with extensive security background
- ✓ Threat analysis, detection and mitigation
- ✓ End-to-end enterprise security
- ✓ 70 engineers and master ASEs in all HPE categories
- ✓ HPE OEM global partner and integrator

Contact us today at 1-800-937-4688 or visit www.ConRes.com to learn how we can help you combat cyber risk with multilayered protection.
