

Join the Growing List of Equine Vets & Breeders Switching to Datamars

DATAMARS

**A trusted leader in
animal identification
for more than 28 years!**

The Equine Slim is used by the American Jockey Club, Turkish Jockey Club and Dutch Stud Book

- The Equine Slim microchips meet the new USEF Rules(s): EQ103.2, HU 101.2, JP100.2, and FEI Passport requirements.
- We offer the only **thin** polymer microchip on the market - **Equine Slim**.
- The Datamars Equine Slim microchip weighs a fraction of standard glass microchips.
- In a study conducted by the Institute for Equine Science, the Equine Slim was proven to cause no stress reaction in the horse during implantation with the smaller 14-gauge needle.
- Our revolutionary, bio-compatible, polymer microchip comes pre-loaded in sterile syringes ready for implantation and are designed for ease of use.
- Your horse's ISO-compliant Equine Slim microchip can serve as verifiable proof of ownership for competitions and personal insurance.
- We sell only ISO-compliant, 15-digit, 134.2 kHz microchips and universal scanners.
