

We are hiring !

We are currently looking for a
Head of IT

About CheckHub.io

CheckHub.io is a fast growing startup helping companies to automate the handling of documents when hiring new candidates.

We are looking for someone with :

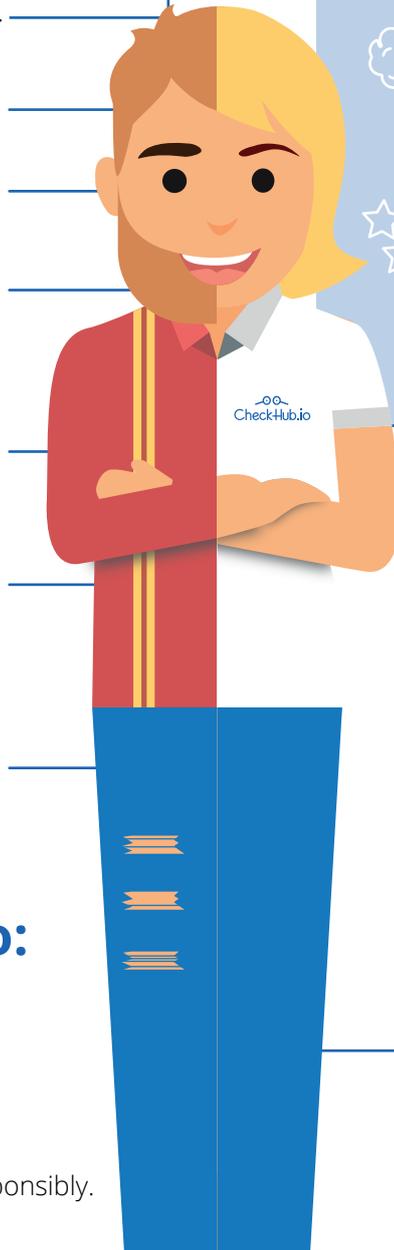

-  In-depth knowledge of PHP5, MySQL and JavaScript.
-  Object oriented programming.
-  Version management with GIT.
-  Good knowledge of Debian Linux systems.
-  Working knowledge of web and network security issues.
-  Comfort in developing and maintaining strong CI practises, such as unit / integration / regression testing.
-  Continuous deployment, issue and workflow tracking, and configuration management for multiple environments.
-  Good hands-on experience on MVC framework.

We're looking for someone who:

-  Delivers on time.
-  Has good managerial skills.
-  Speaks good technical English.
-  Works independently and responsibly.

What you'll do will include

-  Understanding the overall technical architecture of the application.
-  Discussing the technical aspects of the application solution architecture, including the technology used and methodology followed.
-  Defining the technical requirements for the implementation of the technical solution.
-  Designing and developing the overall solution, reusable frameworks, etc.
-  Understanding various non-functional aspects and providing a solution to optimize performance, scalability etc.
-  Enforcing sound development practices and ensuring the quality delivery of the solutions.

What we offer:

-  A very dynamic startup experience.
-  Opportunities to learn through workshops, collective brainstorming and customer interactions.
-  A strong team spirit with your future 15+ colleagues of Startup Factory.
-  The best working place in the heart of Brussels (@ Co.Station).
-  Equity ownership.
