

# ZENBOOTH

## The Comfort Booth Information Guide

---

---

### OVERVIEW

---

The Comfort Booth is a free-standing, portable privacy booth that people use to have quiet conversations, focus on high intensity tasks and avoid excess office noise. It can be easily assembled with a hand drill, and installed within 1-2 hours.

- All wood products are manufactured in the U.S., and exceed California Air Resources Board's (CARB) stringent formaldehyde emission standards.

- Recycled denim soundproofing insulation is STC rated for commercial and residential use.

- Wood ceiling frame with skylight made of 1/2" plexiglass.

- Anodized aluminum door with 1/4" glass window.

- All electrical components are ETL tested and UL listed as compliant by U.S. standards.

- A sensor automatically turns off all electronics and ventilation fans within the booth when it is not occupied.

- The booth is plugged in from the backside by a standard electrical outlet cord, that is 15 feet long.
