

Cost & Productivity Analytics

ENVISION®

Manufacturing organizations are focused on productivity and cost. To maintain their edge, they rely on innovative concepts such as lean manufacturing, connected factory (IoT), or supply chain automation. Envision fosters that effort by allowing users to elevate the growing amount of collected data to insightful knowledge, through dynamic and multi-dimensional analysis in real time.

Envision provides businesses with advanced analytics to develop detailed cost models that account for every step of the manufacturing process.

Envision enable you to build dynamic scenario analysis models with configurable options i.e. make or buy, manufacturing locations & countries in order to optimize cost and profitability.
