

## **Software Engineer**

### **Job Description:**

At Kubica Corp, we strive to provide excellent solutions and services because our customers matter, making us an industry leader in Control Systems Integration. We are seeking a driven and talented Software Engineer that is interested in delivering excellence in execution as a part of our team!

### **If You:**

- Are a dynamic thinker
- Have a high degree of self-efficacy
- Are flexible in the face of change and determined to continuously improve
- Thrive in a cohesive team
- Want to work where your ideas matter

### **Then Kubica is the place for you!**

The software engineer is responsible for the full development cycle of a project. The ideal candidate will need to have a depth of knowledge and skills in object oriented programming using various Microsoft platforms and open source technologies including, C# and ASP.NET.

### **Education and Experience:**

- Minimum of a Bachelor's of Science degree in computer science/engineering required.
- 2 to 3 years of experience in coding is desired.

### **Skills and Special Requirements:**

Ideal candidate is proficient in the following skill sets:

- Innovative .Net Development
- Skilled in many aspects of the web and mobile platforms
- Ability to collaborate through group design, peer reviews and AGILE practices
- Scheduling flexibility, sense of urgency, motivation and versatility to make a substantial contribution to the teams' success
- Ability to interact with customers and suppliers in a professional manner while representing Kubica Corp
- Proven team player and willingness to work "above and beyond" in order to meet company goals and customer's needs

*Background screening including previous employment, education, criminal history and driving record verification may be conducted.*
