

Dynamic Warm-Up & Cool-Down.

Do this complete warm-up and cool-down before and after every workout.

Dynamic Warm-Up *~Prepare & Activate~*

- | | |
|---|--------------------------|
| 1a Leg swings (forward/back and side/side) | 1 x 8/leg each direction |
| 1b Bent-over thoracic rotation | 1 x 8/side |
| 1c Prisoner squats | 1 x 8 |
| 1d Inchworms | 1 x 8 |
| 1e Prisoner split squats | 1 x 8/side |
| 1f Single leg dead lift with lateral reach | 1 x 8/side |
| 1g Jumping jacks | 1 x 20 |

Notes: You can begin the warm-up completely cold. If you are sore, foam roll before the warm-up. Perform the full circuit one time.

Cool Down *~Stretch & Recover~*

- | | |
|---|-------------------------|
| 1a Foam roll all major muscle groups, paying extra attention to tight, achy areas. | |
| 2a Rope hamstrings stretch | 1 x 4 deep breaths/side |
| 2b "Frog" inner thigh stretch | 1 x 4 deep breaths |
| 2c Kneeling hip flexor & quad stretch | 1 x 4 deep breaths/side |
| 2d Wall "figure 4" hip stretch | 1 x 4 deep breaths/side |
| 2e Post or doorway chest stretch | 1 x 4 deep breaths/side |
| 2f Post or doorway upper back stretch | 1 x 4 deep breaths |

Notes: Always foam roll first. If you are short on time, foam rolling is more important than the stretching, so be sure to roll. When stretching, use your breaths to relax your muscles and find a deeper stretch. With every exhale feel the tension release a little bit more.

Notes: Your speed and intensity are completely subjective. You will be listening to how hard you feel like you're working at any given moment. Use the Sprint Intensity Guide to determine your speed and resistance. This workout can be done running outside or on a treadmill, using a spinning bike, rowing machine, stair stepper or elliptical. You can play with resistance and incline to change the intensities. For example, sprinting flat at 10 mph and sprinting at 8% incline at 7 mph may both feel *Fast*.

Sprint Intensity Guide

Rest – A passive rest. No effort required, whatsoever. If using a cardio machine (treadmill, elliptical, stairstepper, rowing machine), stop moving.

Easy – A walking pace. Very minimal effort required.

Moderate – Some effort is required. Similar to a light jog or spinning with no resistance.

Hard – Lots of effort is required. Similar to a fast run or spinning with hard resistance. Should not be able to sustain this for longer than a minute or two.

Fast – Near maximal effort is required. Similar to a full sprint or very heavy resistance.

Max – Maximal effort. This is the most effort your body is capable. Should not be able to sustain for longer than about 15 seconds.
