

A COMMON INDUSTRY FRAMEWORK TO FACILITATE INTEROPERABILITY AND THE EFFICIENT EXCHANGE OF DATA

- ((✓)) **Maintain control and ownership** of data while meeting buyer requirements
A perfect on-ramp/off-ramp for blockchain
- ((✓)) **Automate supplier data** — Once connected, information can be selectively synchronized with the right people automatically
- ((✓)) **Leverage open-source libraries** and Academia for compatibility and interoperability across industry
- ((✓)) **Reduce expensive “one-off” integrations.** When partners align to the Trellis Framework all are compatible
- ((✓)) **Any system, any format, any device, anywhere.** *You’re in control of your data.*

Connecting data from the farm to the shelf is complex and opens legal, ethical and business challenges that must be considered carefully.

With the Trellis Framework, you're in control. You can quickly **synchronize** data **selectively** among trading partners according to ‘**smart contracts**’ that you govern.

Everyone reduces costs with built-in digital signatures for real-time **authenticity** (*without 3rd party fees*), self or cloud **hosted options**, industry and **academia supported** libraries to keep up to date, and an **open-source** community that **fosters innovation and competition**.

Trellis is built for you. We look forward to discussing how Trellis will **add value and reduce costs** for your **internal systems**, your **suppliers** and your **customers**.

Getting Started Is Easy

Trellis offers options to suit all technical capabilities and preferences

- **Self-serve:** Join and contribute to the open source community; implement the functioning code in your own data center or Docker® instance.
- **Just plug it in:** Turn-key apps and plug-ins for PDFs, spreadsheets and common tools like Google® Drive, etc. are available and can be customized for your needs.
- **Need a hand?** Professional implementation is available including management consulting, enterprise security, hosting and supplier onboarding.

*Trellis is housed at the **Open Ag Technology & Systems (OATS) Center at Purdue University**. It is open source and we welcome contribution from industry, service providers, regulatory bodies and NGOs. Enterprise and private deployment options are available to support your strategic and technical requirements.*

CERTIFICATION BODIES

*Trellis supports your digital transformation initiatives and can be an excellent connector to your new or existing IT and data services. Ask about a limited-time **FREE plug-in for Certification Bodies** available from ((centricity)). Subject to offer details, **you can be Trellis ready in days, for free.***

GROWER-SHIPPERS

Selectively connect suppliers and your buyers** without wrangling papers and PDFs. Trellis is an excellent choice to also connect “neighbors” for exchange of audit and other info such as quality, agronomy, PTI or ASN data. Run your own sync manager for free and **maintain independence.

BUYERS / DISTRIBUTORS

***Save time and money** your staff is currently spending to manually enter audit data into your computer systems. **Truly understand and reduce your company’s risk and enhance compliance and supply chain efficiencies.** Simply encourage your certification bodies to conform and offer your suppliers a free sync manager.*

SOFTWARE / IT SUPPLIERS

Help your customers to selectively synchronize data** among integration partners. Collaborate with the open-source team to connect your software or IT services to Trellis and **make a real difference by improving interoperability and automation for our industry.

**A FRAMEWORK FOR DATA EXCHANGE
BUILT BY INDUSTRY, FOR YOU**
