

7741 BUSINESS PARK

MARANA, AZ

7741 Business Park Dr. exemplifies the potential that an obsolete and defunct industrial chip manufacturing building can become. 7741 at its completion has become one of Marana's state of the art 50,000 SF office facilities. The renovations began with a complete interior gut. And completed with a new roof, HVAC units, newly graded parking lot, and covered patio in the rear. This building offers efficiency for a dense call center user as well as the ability to blend an outdoor and indoor experience for its employees.
