

Century Link is a 7,016 SF single story office and industrial block masonry building in Peoria, AZ. Located on Cactus and 91st Ave. The building design is modern with metal and varied block types to provide texture to the building. Century Link is a leading provider of Internet, TV and Voice that works hard to ensure the service they provide is more accessible, more affordable and less complicated. LGE Design Build and DBM Ventures was able to assist Century Link in the acquisition and lease back of this property. CenturyLink was resistant to owning at the time and looked for a partner provide everything necessary for their ground up building and operation.
