## Benefits

# 40-75%

TCO cost savings

# Minutes instead of days

Faster provision

# 60%

Less storage costs

Higher Agility

Lower Costs

Less Complexity

Higher Innovation

# What type of issues can you solve with Azure for SAP?

- Rollout of your SAP solution to a new plant, subsidiary, country, merged company
- Help in *the decision making process for new solutions*, by having immediate Access to solutions, testing and benchmarking
- Free up resources for innovation, quicker time to value and time to market
- *Business value driven*, customer experience oriented IT resources
- Quick deployment of new Cloud based services, apps and solutions that can add rapid value to current systems and applications, by faster and easier Cloud 2 Cloud integration
- A better adjustment of costs to real time IT needs, having almost unlimited resources and quick provisioning for peak loads and decommissioning or stopping resources once they are no longer needed
