6 Old Parkbury Lane, Colney Street, St Albans, Herts AL2 2DL

Our advanced online portal and pallet scanning system allows you to view your consignment's exact location, on a map – at anytime, in real time

Pallet scanning system

Our pallet scanning system uses a network of scanners and HD cameras to scan and photograph every vehicle and each individual pallet through every pallet sortation centre at the national hub before it reaches its destination.

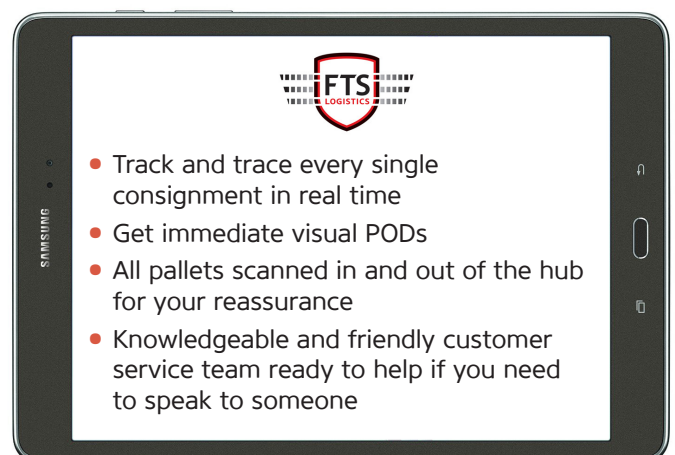

This provides full visibility of all vehicles and the location and physical condition of each individual pallet for your peace of mind.

Pallet Track and Trace

Our driver will record and upload real time information about your consignment from loading through to the point of delivery via tablet, taking a visual record of the POD which is immediately available to view.

Track and trace every single pallet, every single time, without the need for a phone call – just log on to see all estimated times of arrival and exact delivery times with our transparent, web-based, real time solution.

Track your order
online in real time
