3 SIGNS IT'S TIME:

#1 Your Team Has Grown or Volume Has Increased

Your copier may have been perfect for your business when you purchased it, but things change. Are there more people using your copier? Has the average monthly number of prints and copies changed? It may be time to re-evaluate your device to make sure it still meets your needs.

#2 You're Needing More Frequent Repairs

Our highly-trained service team is the best there is, but high-page-count copiers, similar to high-mileage cars, become less reliable, eventually needing to be replaced. Have you noticed an increase in service calls? Maybe parts and supplies are becoming harder to get. Your copier has been a great asset to your team but no machine can run forever.

#3 Your Team Demands Greater Efficiency

Technology changes rapidly, and copier technology is no exception. Newer copiers are not only faster and more reliable than their predecessors, but offer more robust workflow, security features, and energy efficiency. For many businesses, an updated copier is the tool that helps their team accomplish more.

BENEFITS

- New Technology, Added Features
- Faster and More Efficient
- You Could Save Money
