

chatchamp.io is looking for a

## Front-End Developer with a UX/UI Focus (m/f)

### chatchamp

Do you want to work on the next generation marketing platform involving machine learning, NLP and chatbots? chatchamp is revolutionizing marketing with our automatized Messenger Marketing platform. We are a young and fast-moving startup with flat hierarchies and a focus on learning as we are working with a brand new technology.

### Your role

- Place yourself into our users' minds and design an experience that they'll love
- Turn complex requirements into simple, usable user flows
- Create mockups and prototypes to create consistent user experience
- Draft and implement the visual language of our products
- Produce high-quality visual designs from concept to execution, keeping various screen sizes and devices in mind

### Our tech

- Scripting Languages Only 📄
- JavaScript (React) and Ruby on Rails in the Frontend

### Your profile

- First development experiences in at least one scripting language
- You work independently, are highly motivated, a fast learner and a problem solver
- Language skills: English (full professional proficiency)

### Perks

- Flexible working hours, competitive salary and possibility of home office
- Book Flat Rate 📖 and Online Courses on a regular basis
- And of course Team Events, Unlimited Fruits and Bavarian Beer 🍺 (after work)

We look forward to your short and concise application, Please send us your CV or LinkedIn profile, together with earliest starting date, at [jobs@chatchamp.io](mailto:jobs@chatchamp.io).

Let's Revolutionize Marketing Together!
