Why ECN's bifacial technology:

- Additional yield in high-albedo location
- Possibility for vertical mounting in any orientation (infrastructure/anti-soiling)

ECN offers support in:

- Evaluating or designing new applications of bifacial PV modules
- Product design for maximum yield and aesthetics
- Prototyping and field testing

Modular noise barrier 'solar highways'

'Living lab' solar noise barriers

ECN:

- has broad experience in designing and evaluating novel, bifacial applications
- is founder and partner of Solar Energy Application Centre (SEAC) in The Netherlands
