futuredigital

FUTURE DIGITAL IS DELIGHTED TO BRING YOU VERSION 7 FEATURING FANTASTIC DEVELOPMENTS IN ITS ACTIVE INTELLIGENT ONLINE AND OFFLINE MONITORING SOFTWARE.

Intelligent Monitoring
PROTECTING STUDENTS FROM HARM

Futures Cloud 7 offers the most intelligent and effective monitoring solution for safeguarding in schools. It's intuitive system makes it effective in capturing concerning incidents both online and offline.

With its highly visual console, users can easily see concerning incidents in real-time both during and outside of school hours.

Due to the rise in need to monitor all devices on school premises, Future Digital is adding BYOD functionality and monitoring on un-managed devices later this year.

Did you know over 60% of safeguarding risks are captured offline?

Why is safeguarding monitoring software needed?

Active monitoring software is a KSCIE legislative requirement in schools.
The software helps pick up on thoughts that children can't say aloud related to:
Suicidal Thoughts, Eating Disorders, Radicalisation, Cyberbullying, Sexual Grooming, Self-harm, Racism, and Depression.

Features

- A cloud-based console interface available from any Internet-enabled device

- Uses a highly visual heat map and risk grading, allowing users to assess risk in real-time.

- Intelligent pre-grading reduces the amount of false positives.

- Improved reporting engine with an all new reporting suite coming in Q2 2018

- Still captures text and pictures even in private browsing.

- Easy to install client software with updates delivered by web-based console

- Cloud-based storage, no requirement for any local server infrastructure making it GDPR compliant.

- Meets current safeguarding legislation including KCSIE and PREVENT.

- Works across all social media sites

- Support for Windows 10, latest MacOS and IOS (ChromeOS, Linux and Android*)

- Monitors static imagery, video streaming and webcam activity

* Available summer 2018

COMING SOON
Monitoring un-managed devices, BYOD,
advanced monitoring text message alerts.
