INTRODUCING A NEW ERA IN STONE SURFACES

# Introducing Zero Crystalline Silica

## INTRODUCING A NEW ERA IN STONE SURFACES

We are excited to introduce a new era in stone surfaces with our Zero Crystalline Silica range. This innovative development marks a significant milestone in our commitment to health, safety, and sustainability within the industry.

Our new surfaces are formulated to contain 0% crystalline silica. This advancement not only enhances safety for our fabricators but also sets a new standard in the industry and exceeds the latest Federal Government regulations.

## NEW FORMULATION

The new Zero Crystalline Silica range is manufactured in the same way as traditional engineered stone, but with a key difference in the raw materials used. Our Zero Crystalline Silica surfaces are formulated using natural minerals and innovative recycled materials, such as glass, providing advanced, sustainable solutions.

## SAME DURABILITY

Despite the change in composition, the new surfaces maintain the same renowned durability, including heat, stain, and scratch resistance.

MATERIALS	Non Porous	Heat Resistant	Impact Resistant	Stain Resistant	Scratch Resistant	Minimal Joints	Bendable	Light-weight

# Care & Maintenance

## EVERYDAY CLEANING

Wipe with a clean, damp cloth and mild detergent or a multipurpose cleaning spray without bleach.

We recommend using Granite Transformations' specially formulated **Stone Surface Cleaner & Protector Spray** and wipe with a microfibre cleaning cloth.

## STAINS & STUBBORN MARKS

Avoid leaving spillages on the stone for extended periods of time. Treat stains with a diluted formula of bleach and water for no longer than 5 mins, or a Magic Eraser sponge from your local supermarket.

We recommend applying Granite Transformations' specially formulated **Stone Surface Creme Cleaner** together with a damp Magic Eraser sponge, wiping in a circular motion. Rinse off and wipe surface dry.

## CARE AROUND HEAT

Granite Transformations surfaces are heat resistant up to 148C, however we recommend always using a chopping board or trivet when placing hot cookware on your benchtop to avoid scorch marks.

Place heat-generating kitchen appliances like Air Fryers, Slow and Pressure Cookers, on a heat protection surface.

# Warranty

At Granite Transformations, your peace of mind is our top priority. That's why we offer a 10-year manufacturer's warranty on all our surfaces. We stand behind our products completely, and we're always here to answer your questions, address any issues, and ensure you get the most out of your Granite Transformations surfaces.
