This tub is specifically designed for use on young stressed beef and nonlactating dairy cattle fed in confinement (receiving and hospital pens) or to compliment roughage (grass, hay or dry grass pasture) and/or light grain. The Opulent Stress Tub supports digestive health and promotes consistent feed and water intake of stressed cattle. This product is also recommended to help calves recover from pre- and post-weaning stresses, vaccinations, and travelling. Feed to breeding cattle 45-60 days prior to calving. Provide plenty of drinking water and free-choice salt.
