INTERIOR PROTECTION

What Is All-In-One Interior Protection®?

All-In-One Interior Protection™ is a concentrated, water-based polymer system that once cured, provides superior protection for your vehicle's interior surfaces. This technology combines the chemistry required for U.V. protection, stain repellency, rips, tears, punctures, and burns prevention into a single product with outstanding protection for today's fabric, leather, vinyl and carpeted surfaces. *

Proven Protection!

1 Upholstery Protection

Independent laboratory testing reflects ECP's Interior Protection products:

- strengthened leather by minimizing wear by as much as **49%**
- strengthened vinyl by minimizing wear by as much as **31%**
- strengthened fabric by minimizing wear by as much as **34%**

Testing Standards:
ASTM D7255
ASTM D-2261

2 Cigarette Ignition

Independent laboratory testing showed ECP's Interior Protection products minimize damage from Cigarette Ignition by up to **50%**.

Testing Standards:
UFAC 1990
ASTM D1230

3 Staining

Laboratory testing showed ECP's Interior Protection products **protected surface** from staining.

Testing Standards:
AATCC Test Method #118
AATCC Test Method #22
AATCC Test Method #42

4 Ultraviolet Radiation

Independent laboratory testing showed ECP's Interior Protection products **minimize fading** from ultraviolet radiation.

Testing Standard:
AATCC 183
