EXTERIOR PROTECTION

What Is Diamond Ceramic Exterior Protection®?

Diamond Ceramic Exterior Protection is the **first ever long-term protective coating** to combine nano diamonds with ceramic technology. The nano diamonds give unparalleled shine and reflection, creating a diamond brilliant finish. The ceramic forms a chemical bond to the surface for outstanding performance. The two technologies together result in a stunning appearance with high levels of gloss, slickness, and reflection.

Proven Protection!

1 | UV Exposure

Independent lab testing showed a **greater than 25% increase** in gloss over a ten-year simulated accelerated UV exposure cycle.

Testing Standard:
ASTM D6695-08

2 | Environmental Exposure

Laboratory tests showed ECP's Exterior Protection System allowed test panels to **retain 97.8% of their gloss** after a simulated 7-year exposure versus unprotected panels which only retained 26.2% of their gloss.

Testing Standard:
Gardner Gloss Meter standardized at 50 on #249-5 test plate standard
ACT painted test panel

3 | Rust Prevention

Independent lab testing showed ECP's Exterior Protection products **outperformed competitive products** in preventing surface rust from forming after almost **200 hours** in a salt spray booth.

Testing Standard:
ASTM B117
