

Global University Systems (GIS) is an international network of higher education institutions brought together by a shared passion for affordable, industry-relevant skills. GIS offers a variety of programs, including bachelor's and master's programs, vocational training, English language courses, and business and executive training. If someone decides to study at one of our institutions - whether on campus in Europe, North America or even at home - they join a network of 75,000 students worldwide. We are based in some of the largest cities in the world, with campuses in London, Birmingham and Manchester, on the other side of the Atlantic in Toronto, Chicago and Vancouver; and on the other side of the world in Singapore, Germany and Israel.

In Germany, Global University Systems includes the University of Europe for Applied Sciences and the University of Design (HTK). Our universities are characterized by special practicality, internationality, modern teaching content and the personal interaction with the students. Every day, our employees contribute with innovative ideas to bring us closer to our goals - quality, service, internationality and growth. Our courses are the result of direct exchanges between our professors, employees and our students, as well as the demand from potential employers.

For the winter semester 2021/2022 the master's program "Innovation Design Management" at our Campus Potsdam is looking for

An external Lecturer (m/f/d) "Entrepreneurship"

The teaching load comprises 6 SWS (weekly teaching hours) over the semester of 14 weeks: 2 SWS theory and 4 SWS exercises, groupwork or discussions each week

About the course

The course aims at giving students an overview over the field of Entrepreneurship and to convey an entrepreneurial mindset. After the course they know what is important to develop successful start-up ideas and strategies and what it takes to bring them to live. The expected outcome of the course is a business design strategy and a business plan, both innovative and feasible, for a business venture idea.

Topic suggestions:

- Understand Lean Startup Methodology and related concepts
- Develop and validate Business Ideas and Strategies
- SWOT-Analysis and other strategic tools
- Develop Business Plan
- Legal side of founding a business
- Understanding Start-up Finance and Funding
- Pitch Presentations and selling ideas
- Marketing and Growth
- Start-up culture and typical challenges
- Design Sprint Methodology
- Soft Skills for Entrepreneurs

We are open to your ideas and topic suggestions!

About our program

The master program "Innovation Design Management" is positioned at the intersection of Design and Business. It wants to shape individuals who accept today's complex, fast-paced business challenges and take an integrated approach with strategies that combine the best of Design, Business, and Technology.

This is accomplished through a range of intense project activities and cooperations with leading industry professionals and enterprises who face these very challenges.
