

TRANSFORM YOUR FREIGHT INVOICING

SHIPPERS

DL FREIGHT is a reconciliation-free invoice and payment solution that provides unparalleled transparency into your supply chain. The system consolidates and automates the invoice generation process, providing an accessible single source of truth for all transaction data, thereby creating a unique level of trust between all members of the supply chain.

Modern freight networks have evolved into immeasurably complex structures with multiple parties, customers and systems that don't speak to each other. Issues such as incomplete information, fraud, insufficient visibility, overpayments, and manual processes impede the invoicing process.

DL Freight creates a shared truth between shippers and carriers, helping to reduce disputes, payment errors and the reliance on 3rd party auditing firms. Manual invoice verification is no longer required, this notoriously imprecise and tedious task is now automated and error-free. The results are substantial freight cost savings and significantly improved shipper-carrier relationships.

Realize the Benefits

Reconciliation free invoicing

Invoices are created during transportation. Upon delivery, the invoice is completed, automatically approved and payment ready.

Dispute reduction

A single source of verifiable truth is accessible to shippers and carriers.

Freight network visibility

Freight network visibility enables better route planning, live corrective actions, and the optimization of LTL and FTL planning.

Improved operational planning

Eliminate data duplication and receive early-alerts of missing information.

Immediate cost reduction

A reconciliation-free system doesn't require 3rd party freight auditing and reduces freight spend with QuickPay integration.

“ ...The biggest improvement for Walmart Canada the reduction of manual work in resolving disputes. The cost and the waste associated with chasing dispute resolution has come down dramatically – from 70% to now under 2% ... helping to save millions of dollars in waste. ”

John Bayliss - SVP Logistics and Supply Chain, Walmart Canada

Features & Capabilities

 <h3>Real-time Invoice Generation</h3> <p>Invoices are created and populated in real-time, including any accessorial charges incurred during transportation.</p>	 <h3>Proof of Delivery</h3> <p>Upon shipment completion, a PoD is automatically generated and recorded for validation.</p>	 <h3>Faster Decision Making</h3> <p>Instant alerts notify of any potential disruptions, allowing proactive, or in-situation corrective actions.</p>
 <h3>Legacy System Integration</h3> <p>Seamlessly integrate with existing systems, including TMS and ERP, reducing the reliance on costly change management.</p>	 <h3>Automation</h3> <p>Business logic and smart contracts enable the automation of previously manual processes and workflows.</p>	 <h3>Shared Ledger</h3> <p>Real-time data access and sharing between authorized parties allows full transparency into items such as transport and fuel rates.</p>
 <h3>Audit & Compliance</h3> <p>A permanent record of every transaction and invoice is stored on the DL Freight system.</p>	 <h3>Quick Deployment</h3> <p>Platform integration and deployment within 30 days, regardless of size.</p>	 <h3>IoT & Index Integration</h3> <p>Real-time IoT information and fuel & tax indices provides impartial shipment data, easily integrated with BI tools.</p>

DL Freight Workflow

 <h3>Collaborative rate agreements</h3> <p>Line haul rates are agreed upon between shipper and carrier prior to transportation.</p>	 <h3>Shipment details confirmed</h3> <p>After the BoL is submitted, the invoice is populated with mutually agreed, known charges including line haul rates, fuel charges and stop charges.</p>	 <h3>Transportation of goods</h3> <p>Accessorial charges such as wait time and layover are automatically calculated using IoT and GPS data as transportation occurs.</p>	 <h3>Shipment arrives</h3> <p>Invoice is complete and includes authorized information, and proof of delivery is automatically recorded for the shipper.</p>	 <h3>Invoice paid</h3> <p>Invoice is completed upon shipment arrival and payment is approved from shipper to carrier.</p>

DLT Labs helps create trust between organizations. Knowing that trust is the currency of good business and the cornerstone of every successful operation, our platform directly supports the development and sustainability of trusted commercial partnerships. A key element of our platform, Intercompany Information Exchange (IIE), is a concept we developed to ensure that accurate information could move easily and securely between organizations that must share the same information to do business - in real time. We like to refer to ourselves as engineers of commercial trust.
