

SEMI-AUTOMATIC CAN HANDLE APPLICATOR

Roberts PolyPro

Multipack Can Handles

Roberts PolyPro's MCA10 semi-automatic handle applicator applies HDPE handles at speeds up to 10 cycles per minute.

OVERVIEW

Roberts PolyPro's MCA10 semi-automatic can handle applicator is designed to apply HDPE handles to four and six packs of beer at speeds of up to 10 cycles per minute. The new semi-automatic applicator is easy to use, is portable and has a small footprint that makes it perfect for spaced constrained environments. Compatible with 12- and 16-ounce cans, the MCA10 is ideal for breweries and mobile canning companies.
