

## INTRODUCING Advizex Wi-Fi 6E/7 Readiness Assessment

### Is your organization ready to take advantage of the additional features, spectrum, and bandwidth that WiFi 6e/7 has to offer?

At Advizex, we are experts in performing comprehensive evaluations of wireless and network infrastructure and the readiness to adopt WiFi 6e/7 technologies operating in the 6GHz band. These assessments encompass key areas such as network architecture, hardware compatibility, wireless best practices, security protocols and bandwidth requirements. This proactive approach enables organizations to capitalize on the benefits of WiFi 6e/7, such as improved performance, increased capacity, and enhanced user experience while mitigating potential challenges and ensuring a smooth transition.

### Assessment Overview

- 1. Kickoff Presentation**
- 2. Limited on-site WiFi survey**
  - a. Office Building/retail space: single floor up to 15K Sq Ft
  - b. Hospital: single floor up to 10K Sq Ft
  - c. School: single floor up to 15K Sq Ft
  - d. Warehouse: up to 25k Sq Ft (overall area to be determined by site based on shelving, inventory on floor, and machinery in place)
- 3. Assessment of current WiFi Security posture**
- 4. Assessment of current network infrastructure hardware compatibilities**

At the conclusion of the assessment, a report of your current WiFi environment and WiFi 6e/7 Readiness will be delivered and presented by the Advizex team.
