

Unlocking AI at Scale

From Pilots to Enterprise Power

Data and AI are no longer experimental—they are essential to how modern organisations operate, innovate, and compete. But scaling AI across the enterprise remains elusive for many. To succeed, organisations must operationalise data foundations, activate AI use cases, and ensure cross-functional alignment. Akkodis helps clients move from isolated pilots to enterprise-wide scale.

Our Data & AI @ Scale framework combines strategic consulting, technical execution, and change enablement to build AI-ready platforms and scale responsible innovation across the organisation.

Unleashing Enterprise Value from AI and Data Platforms

Education-first approach to build AI literacy and governance maturity.

Governance as a business enabler, not just a compliance function.

Continuous monitoring, adaptation, and cultural embedding.

AI & data governance aligned with security, ethics, and risk management.

Deployment and Implementation with appropriate platform controls, trust and adoption.

Business Transformation embedding new processes and ways of working enabled with Data & AI.

Activate and Sustain continuously evolve to support innovation, scale, centre of excellence and governance.

As AI continues to evolve, its true potential lies not only in the technology itself but in the organisation's ability to adapt, learn, and embed it into its core functions. This is a living loop—a dynamic process that transforms how organisations operate and leads in an increasingly technologically advanced world.

In the fast-changing domain of AI, organisations often feel uncertain about how to begin. We assist them in evaluating their current position and defining their desired future by aligning their strategic business objectives with their AI aspirations.

Our evaluation **goes beyond the technology** to enhance agility and strengthen business capabilities.

Adaptability: Recognising that AI transformation is not linear, our approach is designed to evolve with your needs and technological landscape.

Integration: Beyond introducing AI tools, the focus is on embedding AI seamlessly into organisational workflows and leadership practices.

Sustainability: Building a long-term framework for AI capability uplift, which supports continuous learning and scalability.

Key Elements	Focus Area	What We Deliver
AI Literacy & Education	Business and Executive AI Education and Leadership	AI Literacy for Board, Business Leaders and Executives. Develop capability to assess risk and opportunity decisions.
Data Platform Foundations	Unified, governed, scalable data	Modern cloud-based data architecture, migration roadmaps, data catalogues, and governance models
Use Case Identification – Design and Implementation	AI & analytics use case identification and delivery	Rapid prototyping, business case validation, and production-grade delivery of high-impact AI solutions
Operating Model	Organisation-wide structure to scale AI	Target operating model design, capability maturity uplift, AI CoEs, governance frameworks
Operationalising & Embedding AI	AI design, implementation and deployment	Experience Design for AI Solutions, M365 Copilot Program Enablement, Data Platform Accelerate and AI Solution Delivery, Agentic AI Business Solutions
Change & Adoption	Enterprise engagement & capability building	Executive alignment, training, change strategy, business stakeholder engagement
Responsible AI	Ethics, risk and compliance in AI delivery	Frameworks and tooling to ensure fairness, accountability, transparency and compliance with policy and regulation
Value Realisation	Continuous improvement and benefits tracking	KPIs, dashboards, business outcomes reporting and iterative value loops

Let's Scale AI Together, Akkodis delivers...

-  **End-to-End Expertise:** From strategy to execution, we combine business consulting, data engineering, AI development, and organisational change.
-  **Partnerships with Impact:** We work closely with Microsoft and AWS to enable modern data platforms and AI services tailored to your needs.
-  **Responsible by Design:** Our Responsible AI frameworks are embedded in every phase—from use case definition to monitoring in production.
-  **Industry Knowledge:** Deep sector experience in Public Sector, Public Safety & Justice, Healthcare & Lifesciences, Tech for Good, Education, Defence & Intelligence, Utilities and Mining helps contextualise our approach to your environment.

About Akkodis

Akkodis stands as a global leader in Smart Industry, offering digital, engineering, and R&D expertise that harnesses the potential of interconnected data to enhance innovation and drive digital transformation.

Through our extensive educational programs and consulting experience, we assist clients in redefining their AI strategies and business methodologies, boosting productivity, and optimising AI technological tools. Committed to education and innovation, Akkodis aims to create a more intelligent and interconnected future.

Find out more

If your organisation is ready to move beyond pilots and scale AI with confidence, Akkodis is ready to help. Let's unlock your data and AI potential—securely, responsibly, and at scale.
