

# Akkodis Intelligence AI Transformation Program

Turning AI ambition into trusted, measurable outcomes

## Our Perspective: Practical AI at Scale.

Akkodis Intelligence brings together strategy, data, AI and cloud engineering to help organizations adopt artificial intelligence with confidence and speed. Building on Microsoft’s Azure Accelerate AI Transformation Program (ATP), Akkodis provides a structured, enterprise-ready pathway to move from AI ambition to operationalized value—securely, responsibly and at scale.

Akkodis Intelligence focuses on trusted, production-ready AI, not experimentation. Our approach is:

- **Business-led** – AI initiatives aligned to strategic outcomes
- **Secure by design** – Azure-native security, identity and compliance
- **Responsible and governed** – ethics, risk and accountability embedded
- **Repeatable** – industrialised patterns that accelerate value.

The Azure AI Transformation Program is a core enabler of this approach.

## Azure AI Transformation Offer : A Single end

## -to -end journey

### Phase 1. AI Centre of Excellence & Envisioning

Establish leadership, governance and an operating model for sustained AI adoption.

### Phase 2. AI Foundation Architecture

Enable secure, scalable Azure foundations for enterprise-grade AI workloads.

### Phase 3. Generative AI Factory (GenAIOps)

Move from experimentation to repeatable, production delivery.

The **Akkodis Intelligence – Azure AI Transformation Offer** combines a people-centred methodology with deep engineering rigour to evaluate your current state and preparedness to leverage AI at scale for strategic advantage.

## The Outcome

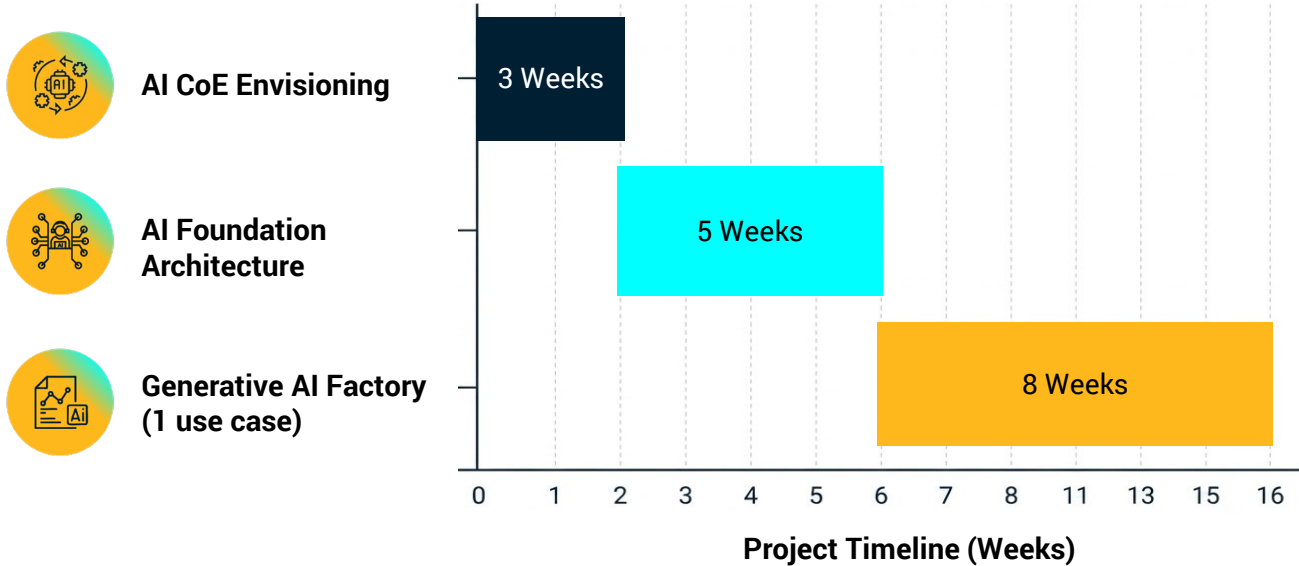

- ▶ A clear view of your AI vision, ownership and governance
- ▶ Secure scalable Azure AI foundations
- ▶ Reduced risk and accelerated time to value
- ▶ Faster path from use case to production
- ▶ An operating model for AI at scale

# Are you ready to scale AI with confidence?

Akkodis delivers the AI Transformation program through three phases, each sequentially delivered.

Phase 1 - AI Centre of Excellence (COE) & Envisioning	Phase 2 - AI Foundation Architecture	Phase 3 - Generative AI Factory (GenAIOps)
<p><b>Purpose:</b> Establish leadership, governance and an operating model for sustained AI adoption.</p> <p><b>What Akkodis Delivers:</b></p> <ul style="list-style-type: none"> <li>Aligned AI vision, principles and priorities</li> <li>Fit-for-purpose AI Centre of Excellence</li> <li>Clear governance, decision-making and accountability</li> <li>Structured intake and prioritization of AI use cases</li> </ul> <p><b>Outcome:</b> An operational AI CoE and agreed AI roadmap—positioned for scale, not pilots</p>	<p><b>Purpose:</b> Enable secure, scalable Azure foundations for enterprise-grade AI workloads.</p> <p><b>What Akkodis Delivers:</b></p> <ul style="list-style-type: none"> <li>AI-ready Azure Landing Zones aligned to the Cloud Adoption Framework</li> <li>Layered AI architecture enabling reuse and consistency</li> <li>Governance, security, networking and data foundations</li> <li>Targeted uplift of existing environments where required</li> </ul> <p><b>Outcome:</b> Production-ready Azure foundations supporting current and future AI initiatives</p>	<p><b>Purpose:</b> Move from experimentation to repeatable, production delivery.</p> <p><b>What Akkodis Delivers:</b></p> <ul style="list-style-type: none"> <li>GenAIOps maturity assessment and prioritised uplift actions</li> <li>Proof of Value delivered as a production-ready MVP</li> <li>CI/CD, infrastructure-as-code and operational observability</li> <li>Responsible AI, content safety and model monitoring embedded</li> </ul> <p><b>Outcome:</b> A deployed AI solution supported by a repeatable GenAIOps delivery model.</p>

## AI Transformation Program

### About Akkodis

Akkodis is a global digital engineering consulting company that enables organizations to innovate and accelerate by applying technology to redefine how processes and products are developed, powered and optimized.

With deep expertise across AI, data, cloud, edge and software engineering, we combine technology and talent to deliver end-to-end solutions, from strategy and consulting to talent development and implementation. Our commitment to Akkodis Intelligence helps businesses connect the exponential power of technology with the irreplaceable strengths of human thinking and collaboration.
