

Build Your Microsoft Fabric Foundation

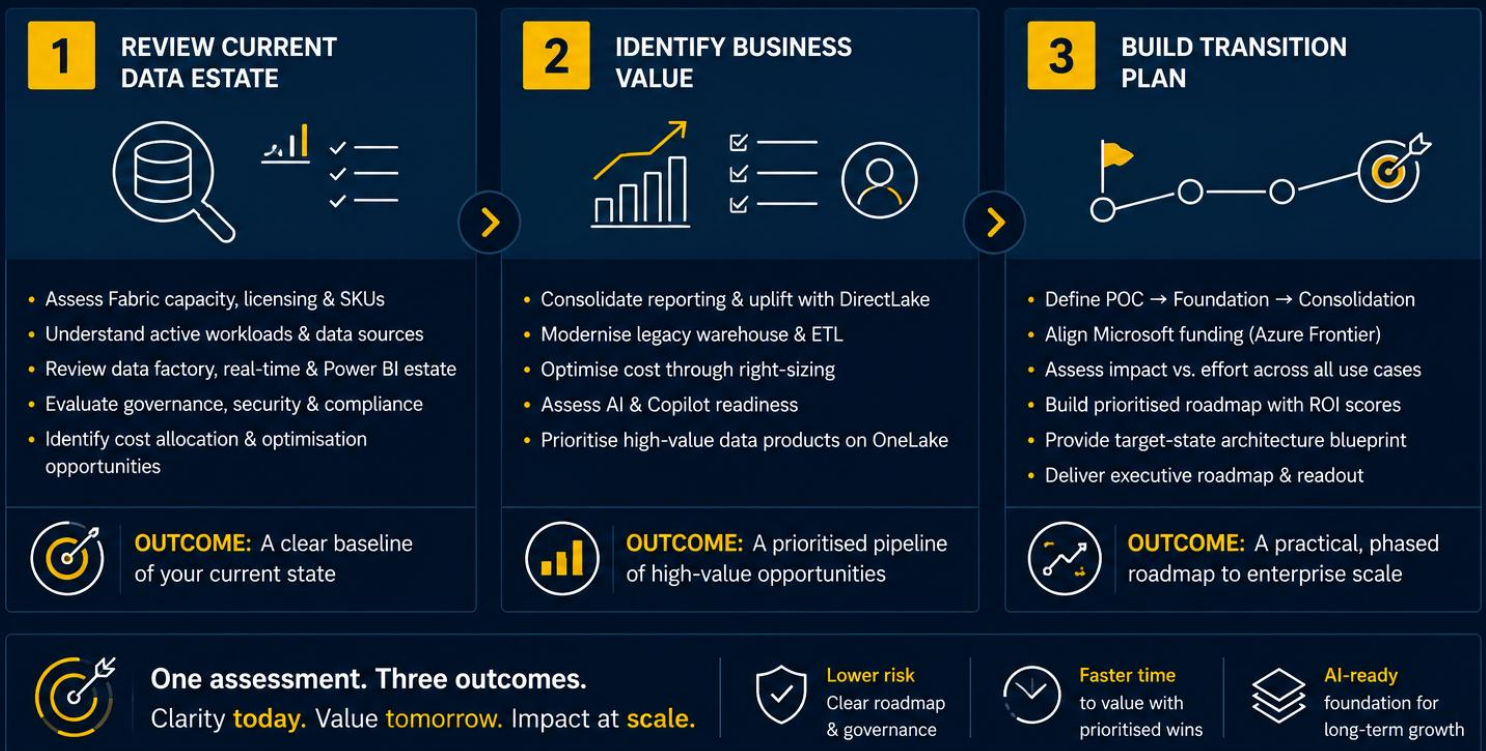

Understand your data. Prioritize the opportunities.
Deliver a roadmap for AI-ready transformation.

Microsoft Fabric unifies data integration, engineering, warehousing, analytics and AI on a single governed platform. But moving from fragmented, legacy data estates to a scalable Fabric foundation carries real risk without a clear current-state baseline and a value-backed transition plan.

The Akkodis Fabric Data Assessment cuts through that complexity - reviewing your current environment, identifying business value opportunities and delivering a sequenced, low-risk roadmap to Fabric adoption.

Three Steps. One Outcome. Your Microsoft Fabric Roadmap.

A structured four-week assessment that delivers clarity,
prioritises value and sets you up for success.

Setting the Foundations for Data Success...

As data and AI continue to reshape how organizations operate, the organizations with trusted, governed data pull further ahead. The Fabric Data Assessment gives you the clarity, confidence and roadmap to close that gap – without the risk of an unplanned migration.

Assess first. Migrate with confidence. Scale AI on a foundation you can trust.

4 Weeks | 9 Workshops | 6 Deliverables | AU\$19,500 Fixed Price

The Fabric Journey — Assessment to Enterprise AI

PHASE 1 POC	PHASE 2 Foundation	PHASE 3 Consolidation	PHASE 4 Enterprise	PHASE 5 AI Scale
----------------	-----------------------	--------------------------	-----------------------	---------------------

Adaptability: Assessment findings directly shape and sequence each phase, delivering value at every step.
Sustainability: Governance, operating model and AI readiness are embedded from the start.

Five Tangible Deliverables at Assessment Close

1 High-Level Architecture Blueprint	Current and target-state Fabric architecture: OneLake design, lakehouse and warehouse patterns, ingestion flows, integration, security and governance model.
2 Platform Maturity Assessment & Gap Analysis	Rates ingestion, transformation, serving, governance, analytics and AI readiness across your estate. Defines target state and remediation priorities.
3 Strategic Delivery Roadmap	Sequenced program across POC, Foundation, Consolidation and Enterprise phases - with timelines, dependencies, estimates and partner roles clearly mapped.
4 Use Case Prioritization Backlog	Analytics and AI use cases ranked by value, feasibility and time to value. Each use case mapped to platform maturity milestones for sequenced delivery.
5 Business Mapping & Investment Summary	Quantifies cost reduction, productivity uplift and revenue opportunity. Includes available Microsoft co-funding options (Azure Frontier / Jumpstart programs).

Let's start your Fabric Assessment - Akkodis delivers...

-  **Structured advisory methodology:** Baseline your current state, identify value and build a prioritized roadmap - not just a technology audit.
-  **Experience across complex data estates:** Power BI, enterprise reporting, legacy warehouses and multi-platform analytics environments.
-  **Strong Microsoft Fabric & Azure alignment:** Accelerated adoption, licensing optimization and access to Microsoft co-funding programs.
-  **Governance, cost and AI readiness focus:** Recommendations that connect data platform decisions to AI, Copilot and business outcomes.
-  **Practical, low-risk approach:** Assess before you commit - clarity on what to migrate, when and why before a single workload moves.

About Akkodis

Akkodis is a global digital engineering consulting company that enables organizations to innovate and accelerate by applying technology to redefine how processes and products are developed, powered and optimized.

With deep expertise across AI, data, cloud, edge and software engineering, we combine technology and talent to deliver end-to-end solutions, from strategy and consulting to talent development and implementation. Our commitment to Akkodis Intelligence helps businesses connect the exponential power of technology with the irreplaceable strengths of human thinking and collaboration.

Start Your Fabric Assessment

If your organization is ready to understand your Fabric readiness and define a clear, value-backed path to adoption, Akkodis is ready to begin.
