

## Frontend Developer (m/f/d)

full-time / remote work possible

Fanbase GmbH was founded in November 2020 in Munich, Germany and is an ambitious and well-funded tech start-up focusing on the creator economy. Fanbase is a social marketplace for digital content that allows creators to build a vibrant, sustainable community. Our experienced team of developers works closely together with the founders of Fanbase and is currently looking for highly motivated team members.

### Responsibilities:

- Development of our frontend (TypeScript/React)
- UX-optimization in collaboration with our design-team
- Performance-optimization esp. server-side/client-side rendering and data exchange between backend and frontend
- Development of future-oriented architectures and solutions
- Quality assurance (unit testing, integration testing, code reviews) in connection with a fully automated CI / CD environment

### Qualifications:

- First relevant work experiences
- Practical experiences with React, TypeScript, version management tools (git)
- Experiences with Cookies, Websockets, Promises, HTML5, client-based data validation, CSS
- Previous experience working with new technologies to help further develop the product
- An approach to tackle and solve problems in a structured manner
- Knowledge of Docker / Docker-Compose
- Very good English skills, German skills beneficial but not necessary

**Benefits:**

- An exciting job in a start-up with great opportunities for success
- A good potential to grow both professionally and personally
- A fair compensation with flexible working hours
- The chance to shape the future of Fanbase
- Low hierarchies and direct interaction with the founders

**Next:**

If you are interested in this exciting position, please send your application (incl. CV and your earliest date of availability) via email to [career@fanbase.com](mailto:career@fanbase.com). We are looking forward to hearing from you!
