

Presentation of the Klingele Group

Our Strengths

We are committed to Timing - Technology - Teamwork

Timing

- Dynamic family-owned and -run company
- Rapid response thanks to flat hierarchies
- Computer-controlled, optimized process management
- High flexibility through short machine set-up times

Technology

- Ongoing investment in state-of-the-art technology, equipment and processes
- Sophisticated, mutually compatible production lines across all box plants

Teamwork

- Highly committed employees
- Close collaboration across all parts of the group
- Long-term partnership & intensive dialogue with customers, suppliers & the community

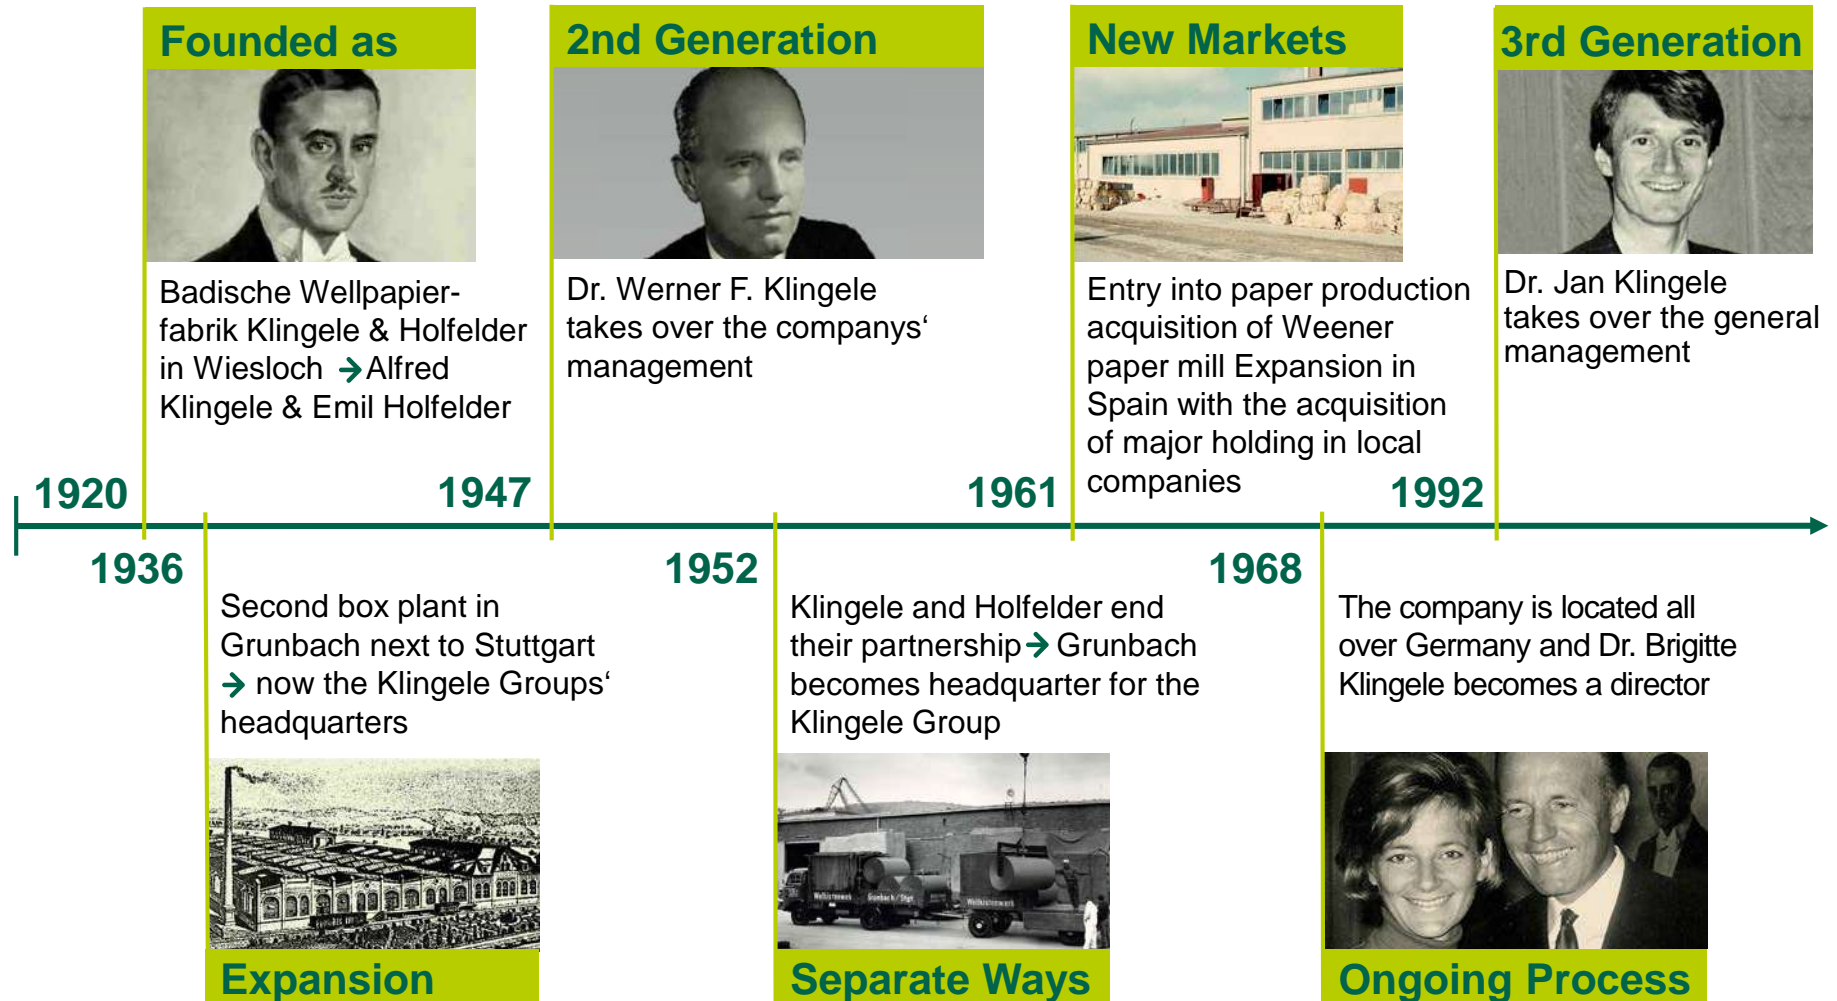

»» *As a dynamic supplier of packaging solutions and corrugated paper, our aim is to be our customers' preferred partner. We invest equally in long-term relationships and the latest technology. We see ourselves as partners to our customers, suppliers, staff and to society. This is why we place great value on sustainable success together.* ««

Dr. Jan Klingele

Material Handling

Our Weener Paper Mill

Location Weener, Germany

- **Founded** 1958
- **Employees** 133
- **Capacity Paper** 270,000 t/a
- **Products** Testliner, Fluting
- **Basis Weights** 110 – 180 g/m²
- **Raw Material** 100% waste paper
- **Paper Width** 5 m
- Power supply via the company's own CHP plant
- Own sewage plant

Our Paper Mill Blue Paper SAS

Location Strasbourg, France

Light-weight
paper

- **Founded** 2013
- **Employees** 152
- **Joint Venture** Together with VPK Packaging Group, BE
- **Capacity Paper** 400,000 t/a
- **Products** Blue Liner, Blue Flute, Blue One
- **Basis Weights** 70 – 135 g/m²
- **Raw Material** 100% waste paper
- **Paper Width** 8,62 m
- Power supply via the company's own biomass power plant
- Own sewage plant

Our Paper Mill Weener - Power Plant

Location Weener, Germany

WEENER
E N E R G I E

The power plant is operated on the basis of refuse derived fuel (RDF). This plant provides the Weener paper mill with heat and with some of the electricity it requires.

- **Commissioning** 2008
- **Employees** 32
- **Annual Fuel Consumption** app. 180,000 t/a
- **Saves Annually** → app. 32 million m³ of natural and primary energy
55,000 tons of CO₂-emissions
- **Own Wind Energy Plant**

Our Responsibility

Quality Management

- Implementation of internal and external audits
- Complaint visits to customers and suppliers
- Advice on technical problems and quality issues
- Drafting of customer specifications and quality assurance agreements
- On-site order support
- Laboratory tests on corrugated board and packaging

Our Responsibility

Product Safety & Hygiene Management

- BRC auditing
- Regular implementation of internal hygiene audits
- Customer visits concerning hygiene issues
- Regular housekeeping inspections
- Drafting of risk analyses and risk assessments
- Glass ban in production, management of glass and hard plastic registers
- Supervision of external pest controllers and cleaning companies
- Implementation of annual training for the entire workforce

Printing Processes

The Right Technology For Every Requirement

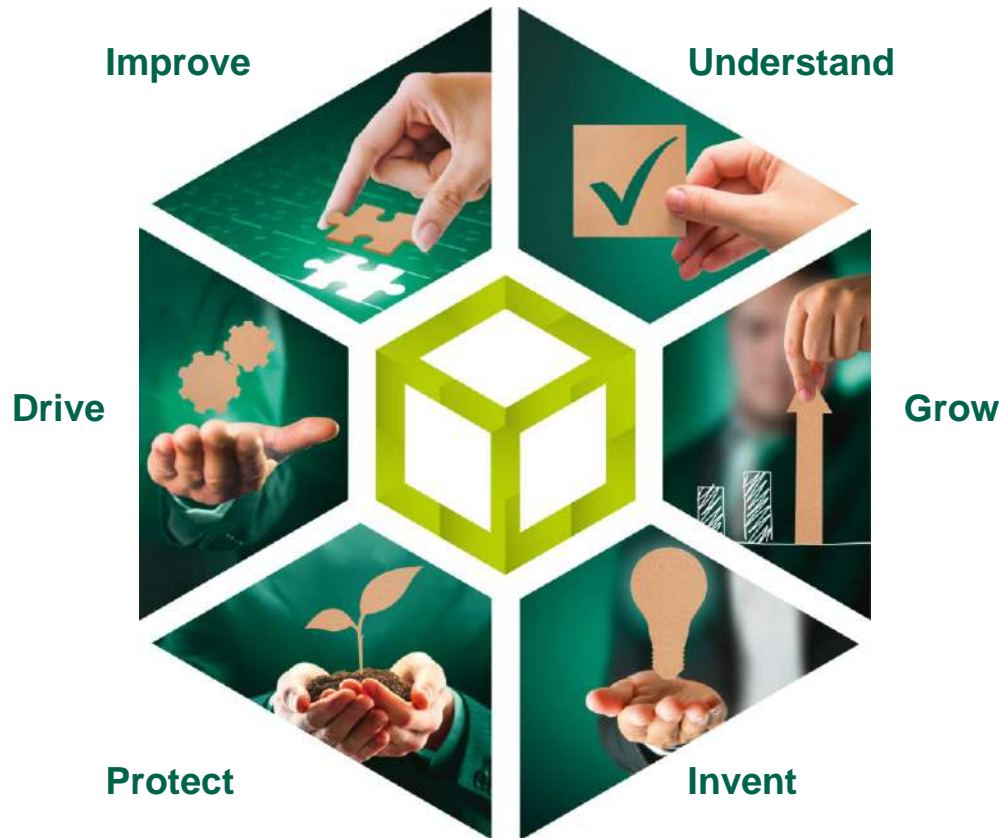

We advise you in all matters relating to printing, such as the optimisation of the visual impact of your packaging or the choice of a suitable printing process.

- Flexographic printing
- Offset printing
- Preprint
- Digital printing
- Silkscreening

The Process for Your Success

Networked Packaging Process

Full-Service from one source

We think in terms of networks – far beyond the pure packaging process and develop comprehensive solutions for our customers.

The packaging-related supply chain is characterised by six different aspects as we understand it.

Know-How and Knowledge Transfer

Klingele Academy

- Individual customer training and workshops on paper, corrugated board, packaging and printing
- Transfer of Expertise:
Corrugated board production and processing as well as printing and surface treatment
- Dynamic joint optimization workshops to support your particular packaging requirements and needs

➔ **Our wide range of seminars
can be found in our current
[programme booklet](#)**

Packaging and Logistics Process

Supply Chain Management

Networked
packaging process
Understand

Our experts get involved even with the development of our products and optimise the supply chain from the very start:

- ➔ Analysis and optimisation of processes along the entire supply chain

Cost drivers in the supply chain can be identified at an early stage and kept to a minimum:

- ➔ Increased process reliability
- ➔ Cost savings
- ➔ Time savings

Comprehensive Packaging Management

Everything from One Single Source

Networked

Consulting

Innovation and Development Expertise

Innovation Management

Our customers benefit from our many years of experience and our structured innovation management. Our experts network at a national and international level depending on the task in hand.

- Cross-divisional innovation team
- Internal and external sharing and transferring of ideas
- Problem-oriented search possibility
- Innovation days
 - ➔ cross-divisional
 - ➔ in every plant
 - ➔ at an international level
- Together with you ➔ Customer workshops

Documented Quality

Central Laboratory

- Goods-in inspections in accordance with defined target values of the container board
- Testing of corrugated board materials and packaging
- Licensed as official testing laboratory for hazardous material packaging made of corrugated board
- State-of-the-art test equipment to identify differences between material information on the processability of paper and corrugated cardboard, printability and adhesion
- 4 point flexural testing possible (only few test equipment in Germany)

Our Responsibility

Carbon-Neutral Packaging

CO₂ compensation through the support of climate protection projects

Cooperation with ClimatePartner

Internationally renowned climate protection consultants and solution providers

- Calculation of CO₂ footprint
- CO₂ label and certificate with ID number
- TÜV-certified process for offsetting CO₂ emissions
- CO₂ label printing for packaging possible

Our climate protection projects

- Cooking stoves in Bamako, Mali
- Forest protection in Oberallgäu, Germany
- Water treatment in Cambodia

The Environmentally Friendly Carrier Bag

WellBag

WellBag

- The biodegradable alternative to plastic bags
- Can be re-used many times to carry shopping or to store things at home
- Stands firmly in a shopping trolley or on the floor
- Can be stacked flat at the entrance or cash desk area – easy to assembly
- Attention-seeking advertising space for your brand image
- FSC®-certified and climate neutral
- Trademarked design and produced "Made in Germany"
- Various sizes: small, medium and large

The Shoe Box with Integrated Handle

WellBag2Go – Shoe Box 2.0

WellBag2Go

- Replaces the classic, two-part shoe box
- No additional carrier bag required in store
- Carry handle assembled quickly and easily
- Easy to assemble thanks to integrated foldable base
- Optimal process thanks to single-piece packaging
- Individual customised printing label possible
- Further shoe boxes can quickly be attached

Transparent Process Chain

RFID-supported Intralogistics

- Automatic paper roll-/ pallet registration and identification
- Transparent paper roll-/ pallet management and logistics chain
- Consistent tracking and tracing from the raw material right up to your receipt of goods
- Provides current and transparent storage status available at any time
- Clearly structured, documented, error-free processes

Full-Service Co-Packaging

We supply fully assembled packaging directly to your packing stations and can provide process special materials or assemble complex packaging for you.

- Quantity-independent
- Automatic and manual packaging
- Timely provision and finishing of your packaging
- Dispatch Options: from packages to pallet shipment

Solutions for Challenging Projects

Packaging Optimisation

- Qualified customer consultants and packaging designers on site nearby
- Holistic packaging design and optimization in close coordination with you
- Pallet optimisation
- Fulfillment of retail requirements, ecological and economic factors and market trends
- Interactive 3D visualization of packaging
- 3D animation, folding instructions, videos, 3D presentation of packaging solutions

Planning – Advice – Sourcing

- In cooperation with an external independent machine-consultant
- Independent advice incl. planning and project engineering
- Manufacturer offering independent problem-solving and quotation proposals
- Optimum solution for your requirements
 - ➔ Packaging, transport, palletisation, etc.
 - ➔ Space requirements, price-performance
- Project support through to the handover of the machine / plant on request
