PART I – GENERAL INFORMATION

1. POLICY TERM

The inception of the earthquake policy will be at 12:01a.m, local time, at insured location. Policies will be written for a maximum 12-month term only.

2. APPLICATION AND BINDING PROCEDURES

Binding and risk approval authority rests with Homesite Insurance Company of California or its authorized representative (the Company).

An Earthquake Insurance program application must be fully completed. No coverage will be bound unless all of the underwriting rules are followed when submitted to the Company and fully satisfied and approved by the Company.

A. The Company reserves the right to decline coverage based on individual risk characteristics that represent unacceptable exposures as defined in Section 8. (Eligibility).

B. Moratorium

When a major earthquake occurs, the Company may impose a moratorium on new business and additional coverages on existing business in the affected area as determined by the Company:

- Moratoriums may be imposed when an earthquake reading 5.0 or greater on the Richter Scale occurs.
- Moratoriums will apply on the day of the earthquake and for at least the 60-day period following the earthquake unless lifted earlier by the Company.
- An aftershock reading 5.0 or greater on the Richter Scale will be considered a new earthquake, and will result in a new moratorium period.
- Renewals are not affected by these restrictions.
- Moratoriums will remain in effect until lifted by the Company.

C. Miscellaneous Restrictions

The Company uses CRESTA (Catastrophe Risk Evaluating and Standardizing Target Accumulations) zones as part of its Catastrophe Management Program to properly control its accumulation of earthquake risk, and to address reinsurance capacity covering this program. CRESTA is an organization that provides geographical data about catastrophes to insurers so that they can assess risk in different locations. CRESTA zones and subzones are listed in the California Earthquake Probable Maximum Loss Questionnaire published by the California Department of Insurance (“CDI”) and is available through the CDI’s website. Accumulations are evaluated by building class, deductibles and limit aggregates in CRESTA zones and subzones. Company may establish temporary and/or permanent restrictions on new business to properly control its accumulation of earthquake risk using the latest EQ Zones/Zip Code List provided by the California Department of Insurance.

3. POLICY FEES AND INSPECTIONS

A policy fee of \$40 per policy is applicable to new and renewal Dwellings earthquake policies. Policy fees are fully earned and non-refundable.

Risks may be inspected by a third party vendor after coverage is bound.

HOMESITE INSURANCE COMPANY OF CALIFORNIA EARTHQUAKE PROGRAM

4. POLICY BILLING

Billing is direct bill only. Policies and invoices are delivered and made available directly to the insured and copies to the producer.

Installment plans are available. For invoiced payment plans, a premium invoice will be mailed directly to the insured prior to each installment due date. A \$10 installment fee is added to all installments, but not the initial down payment.

Recurring automatic deduction is available for all payment plans. No installment fee is added.

5. CHANGES ON POLICY

Policies may be modified during the policy term by an endorsement issued by the Company to reflect changes made to the companion policy; any additional or return premium will be computed on a pro rata basis. Additional premiums of \$5.00 or less will be waived.

6. CANCELLATION OF INSURANCE

Policies may be cancelled at the request of the insured at any time. The return premium shall be 100% of the pro rata unearned premium, less the fully-earned fees. Once a policy is in effect and coverage has been provided, the policy may not be cancelled retroactively by the insured.

Backdated cancellation for duplicate coverage or total loss to the property is limited to 1 year, with adequate proof. Backdated cancellation for no insurable interest will be made effective the same date the insurable interest terminated, with adequate proof.

7. TRANSFER OR ASSIGNMENT

A policy may not be endorsed to effect assignment from one insured to another. Name changes due to marriage, divorce, or death are permitted if accompanied by supporting legal documentation. Name changes to the name of a Trust or LLC and/or termination of the Trust or LLC must be promptly reported.

8. ELIGIBILITY

A. DWELLING EQ POLICY (Form EI EQ HP)

This policy insures owners of dwellings.

Dwellings with the following criteria will be eligible for coverage:

- Wood frame construction
- Concrete slab or solid perimeter foundation
- Residence types of 1-4 family dwellings
- One to three stories
- Risks built 1940 and later

HOMESITE INSURANCE COMPANY OF CALIFORNIA EARTHQUAKE PROGRAM

B. INELIGIBLE RISKS

The following risks are ineligible:

- Dwellings on Historical Register
- Unreinforced and reinforced masonry dwellings
- Risks built on basement, stilts/caissons/pilings or post and pier foundation
- Modular and Mobile homes
- Dwellings under course of construction
- Tuck-under parking
- Dwellings undergoing extensive remodeling, renovation or construction affecting habitability
- Dwellings wholly or partially over water
- Risks with unrepaired prior earthquake damage – All prior earthquake damage must be repaired before the risk will be eligible for coverage. A breakdown of prior damage (amount of loss to the dwelling, other structures, contents, etc.) and proof of repair by a licensed contractor may be required by the Company
- Any premises not used for residential purposes

Property inspections may be conducted on behalf of Company to verify risk eligibility.

C. COMPANION PROPERTY / OTHER INSURANCE REQUIREMENT

The Company earthquake policies may be written only in conjunction with a Homeowners or standard dwelling fire policy issued by an insurance company in which the risk resides.

The insured must maintain a Homeowners or Dwelling Fire policy or its equivalents to be eligible for coverage.

D. COVERAGES

Dwelling (Form EI EQ HP)

Earthquake coverage is available for the Dwelling, Other Structures, Personal Property, Loss of Use and other coverages. For Dwelling policies, Coverage A - Dwelling coverage must be purchased in order to obtain coverage for Other Structures, Personal Property, Loss of Use and other coverages.

Minimum and maximum Homeowners or Dwelling Coverage A Limits eligible for the program are \$100,000 to \$3,500,000.

The minimum earthquake Coverage A limit will be equal to the companion policy Coverage A limit. Higher limits may be purchased with consideration to the risk tolerance and needs of the insured, including potential increases in construction costs after a catastrophic event (commonly referred to as demand surge). Lower limits are available under the Partial Dwelling Coverage option.

The limit of insurance may be automatically adjusted on the renewal date of policy based on general inflation provision or other replacement cost factors for the insured dwelling or the companion policy Coverage A limit.

It is the responsibility of the producer and insured to ensure that adequate coverage limits are requested and maintained.

HOMESITE INSURANCE COMPANY OF CALIFORNIA EARTHQUAKE PROGRAM

Earthquake Policy Coverage Summary by Coverage Type

Coverage Type	Earthquake Insurance Dwelling Policy
A – Dwelling (for Dwelling Policy)	Damage to the dwelling structure covered up to the Coverage A limit. Includes sublimits and exclusions for some types of property.
B – Other Structures	Damage to appurtenant structures (not attached to the dwelling) covered up to the Coverage B limit. Includes sublimits and exclusions for some types of property.
C – Personal Property	Damage to personal property covered up to the Coverage C limit. Includes sublimits and exclusions for some types of property.
D – Loss of Use	Loss of Use coverage provided up to the Coverage D limit.
E – Loss Assessment	Includes \$10,000 coverage for loss assessments from association of property owners. Optional additional limits up to a maximum of \$50,000 available for an additional premium.
F – Limited Building Code Upgrade	Includes up to a maximum of \$10,000 for the additional cost of reconstruction to bring the “dwelling” on the residence premises up to current local residential building code standards as required by a governmental authority before it will approve the reconstruction permit process after losses caused by a “covered event”.
Deductibles	Deductible options of 2.5%, 5%, 7.5%, 10%, 12.5%, 15%, 20% and 25% are available. Deductibles apply separately to the Coverage A, B, C, D, E & F limits. Deductible is waived for the first \$1,500 of Coverage D losses. For Partial Dwelling Coverage policies, the Dwelling Coverage A deductible applies to the “companion policy dwelling limit of insurance”.

PART II – ANNUAL PREMIUM CALCULATION PROCESS FOR DWELLING EARTHQUAKE POLICY

1. RATE CALCULATION CHART – EARTHQUAKE INSURANCE DWELLING POLICY

Coverage Type		A Requested Coverage Limit	B Requested Coverage / 1,000	C Territory Base Rate	D Territory Base Premium

15	Policy Fee				\$
16	Total Premium & Fees (D14 + D15)				\$

HOMESITE INSURANCE COMPANY OF CALIFORNIA EARTHQUAKE PROGRAM

2. RATE TABLES – EARTHQUAKE INSURANCE DWELLING POLICY

Refer to **Section V – Dwelling Territory Base Rates** for base rates by territory.

The United States Postal Service (USPS) periodically adds, deletes and modifies zip codes and zip code boundaries. As a result of this, new zip codes may not yet be listed. For zip codes not listed, the territory of the new zip code will be determined based on the territory of its “parent” zip code (i.e., the zip code from which the new zip code originated). The territory definitions will be updated on a regular basis to reflect zip code changes.

3. PARTIAL COVERAGE A – DWELLING LIMITS FACTORS

Coverage A – Dwelling Insurance to Replacement Value Percent of Total Dwelling Replacement Value	Percent of Premium Factors
100%+	1.00
50%	0.70
25%	0.50

4. CONSTRUCTION FACTORS & DISCOUNTS

A. Year and Type of Construction

Construction Type	Year of Construction				
	Pre-1937	1937-1972	1973-1988	1989-2000	Post 2000
Wood Frame / Metal Frame	1.75	1.30	1.00	1.00	0.95
Masonry Veneer	2.00	1.55	1.25	1.10	1.00

CONSTRUCTION CLASSIFICATIONS

The following construction classifications apply to this program:

Wood Frame / Light Metal

A dwelling with exterior walls of combustible construction (including walls with metal, stucco or metal lath and plaster on combustible supports), with less than 1/3 exterior masonry veneer, is classified as frame.

Reinforced Masonry

Dwellings having load bearing exterior walls of reinforced concrete and/or reinforced hollow concrete block masonry and roofs and supported floors of wood or metal assemblies.

HOMESITE INSURANCE COMPANY OF CALIFORNIA EARTHQUAKE PROGRAM

Masonry Veneer

Dwellings constructed of wood frame/light metal with more than 1/3 exterior masonry veneer. Exterior masonry veneer is defined as non-supporting brick, stone, or other masonry, except stucco, fastened to a wall of different material.

Metal / Steel Frame

The framing of the dwelling is constructed with metal/steel. Most metal homes are constructed on a slab foundation and have conventional features such as vinyl siding, sheet rock and paint on the inside walls.

Unreinforced Masonry

A building constructed of masonry, such as bricks, adobe, Compressed Earth Blocks ("CEBs"), etc. with no reinforcement. Please note that dwellings constructed of unreinforced masonry are unacceptable for this program.

Modular Home

A modular home is constructed of pre-made parts and unit modules. Unlike site-built dwellings, modular homes are placed on a pre-made foundation, and assembled into a single residential building at their site of use. Please note that modular dwellings are unacceptable for this program.

Mobile Home

Mobile homes (also known as manufactured homes) are prefabricated homes built in factories, rather than on site, and then taken to the place where they will be occupied. They are built according to the federal HUD building code. This requires all mobile homes to be built on a non-removable steel chassis, wheels and tow- hitches. Please note that mobile homes are unacceptable for this program.

B. Retrofitting – Applies to Dwellings built prior to 1973

Category	Hazard Reduction Factors
Bolted to Foundation	0.85
AND	
Braced Cripple Walls or No Cripple Walls	

Dwellings built prior to 1973 must meet the following requirements in order to qualify for retrofitting discount:

- (1) The dwelling is properly anchor bolted to the foundation (see definition below); and
- (2) Cripple walls if present (see definition below) are braced with plywood or its equivalent; and
- (3) The hot water heater is secured to the building frame.

Written verification of retrofitting addressing the above three is required for discount. Written verification includes certification of completed work from a licensed building contractor or inspection from a qualified structural engineer or retrofitting inspection service.

HOMESITE INSURANCE COMPANY OF CALIFORNIA EARTHQUAKE PROGRAM

Foundation Bolting – Steel anchor bolts must connect the sill plate (the wood board that lays directly on top of the foundation) to the foundation. Bolts should be placed four to six feet apart.

How to identify if the dwelling is bolted to the foundation – In houses with a crawl space, the presence of bolts can be verified by looking underneath the house. In slab on grade foundation, an unfinished room such as a garage is the best place to verify the presence of bolts.

Cripple wall definition – Cripple walls (sometimes referred to as crawl space walls) are short, wood perimeter walls used to elevate the house above ground to allow access to the construction and utility lines or to level a dwelling built on a slope. The height of the cripple wall generally ranges from 14 inches to 4 feet. The interior or exterior faces of cripple walls should be sheathed with plywood. Many newer homes utilize concrete perimeter walls to elevate or level the home. These are not cripple walls. A dwelling built on a flat concrete slab without a crawl space beneath it will not have cripple walls.

How to identify if cripple walls have been braced – The presence of cripple walls can be confirmed by looking around the perimeter of the crawl space. If wood studs are visible then the cripple walls have not been braced. Braced cripple walls will be completely covered with plywood.

5. NUMBER OF LEVELS

Number of Levels	Factors
1	0.90
1.5	1.00
2	1.00
2.5	1.15
3	1.15
Split Level	1.00
Bi-Level	1.00
Tri-Level	1.00

6. DEDUCTIBLE FACTORS

Deductible	Per Coverage Option Factor
2.5%	1.60
5.0%	1.35
7.5%	1.15
10.0%	1.00
12.5%	0.85
15.0%	0.75
20.0%	0.60
25.0%	0.50

HOMESITE INSURANCE COMPANY OF CALIFORNIA EARTHQUAKE PROGRAM

7. LOSS ASSESSMENT COVERAGE

The Earthquake Insurance Dwelling policy (**EI EQ HP**) includes \$10,000 of coverage. Additional limits up to a maximum of \$50,000 can be purchased for an additional premium. Refer to the premiums for Loss Assessment Coverage in the Territory and Base Rate Tables.

8. SHARED LOSS SETTLEMENT OPTION

An optional shared loss settlement provision is available for a premium discount. If this option is selected, losses to the Dwelling and Other Structures from a “covered event” are shared in the selected proportion between the Company and “insured” after the application of the deductible and up to the Coverage A – Dwelling and Coverage B – Other Structures limits stated in the Declarations. Refer to the exhibit below for the shared loss proportional amounts and associated discount factors.

Coverage Type & Percentage Limit	Shared Loss Proportions & Factors		
	Company Percentage of Losses After Deductible	Insured Percentage of Losses After Deductible	Shared Loss Premium Factor
Coverage A - Dwelling			
Dwelling – 75% Shared Limit	75%	25%	0.75
Dwelling – 50% Shared Limit	50%	50%	0.50
Dwelling – 25% Shared Limit	25%	75%	0.25
Coverage B – Other Structures			
Other Structures – 75% Shared Limit	75%	25%	0.75
Other Structures – 50% Shared Limit	50%	50%	0.50
Other Structures – 25% Shared Limit	25%	75%	0.25
