10:50 – 12:00	<b>Panel 1: “You’re Having Twins!”</b> <i>It’s the kind of news that will rock your world, and the arrival of the Digital Twin is about to do the same for ship owners and operators everywhere. Activities currently the norm in shipbuilding and fleet management, things like 3D models, training simulators, and asset monitoring, are well-positioned to merge under the Digital Twin banner. If we get it right, the result will be a massive value boost to Canada’s fleet. A panel of marine industry innovators based in Newfoundland will share their early ideas on Digital Twin innovation, and connect with the audience to hear what operators are hoping for in this emerging new era of ship management.</i>	Moderator: <b>Gina Pecore</b> , CEO, Genoa Design International  Panelists: <b>Capt Christopher Hearn</b> , Director, Centre for Marine Simulation, Marine Institute <b>Anthony Patterson</b> , President & CEO, Virtual Marine <b>Alfred Whiffen</b> , Director of Business Development, Avalon Holographics
