

RICOH Digital Rights Management

Enterprise Workflow Solutions

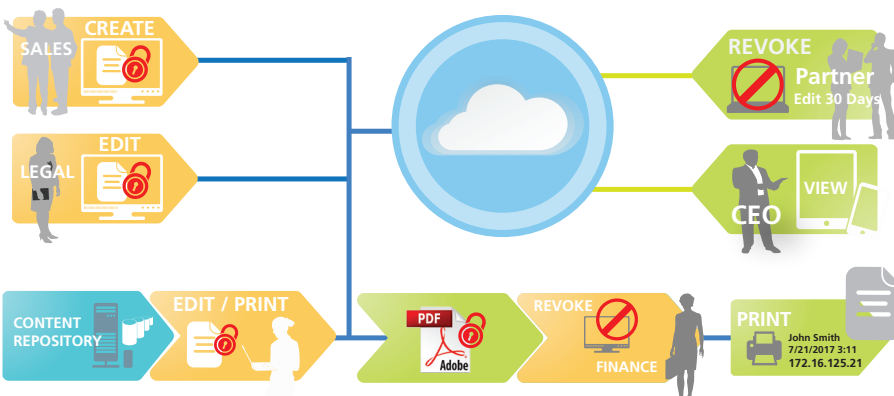

Protect your digital assets within and outside your company's security infrastructure

Almost 71% of data breaches are caused inadvertently due to a careless user or negligence says *Inside Threat Reports (2016)*. Threat to data and information security is not a new topic. Increase in external threats like cyber attack, organized crime, corporate espionage, and so on from traditional and non-traditional sources; higher internal threats due to administrative errors; address an increasing number of government mandates to maintain compliance - all this is now a reality of the digital work environment.

Without an effective strategy for data and information protection, your company remains vulnerable to security threats that can cause loss of digital assets, loss of brand value or even bankruptcy. It's not enough to purchase random anti-virus software or operate a virtual private network (VPN) to ensure complete safety of your company's digital assets. Your digital information should have comprehensive security, whether or not you operate within an enterprise content management (ECM) system.

Keep your shared drives clean and compliant, while saving time and money.

Why Ricoh Digital Rights Management?

Experience Matters

Ricoh professionals have deep, field-proven knowledge to draw upon, including matters of information mobility, security, compliance and understanding today's challenges in managing data.

Technology Leader

Our mandate is to empower digital workplaces. We specialize in office imaging equipment, production print solutions, document management systems and IT services.

Customer Centric

"Customer Centricity" is held as one of five Core Values at Ricoh and the recent 74.3 NPS score is reflective of company-wide efforts to live that ideal.

We'll Help Design Your Solution

Don't worry if you're not exactly clear on what you need or where to begin. Whether you are focused on compliance, internal rights management or external threats, we will discover, scope and recommend what is right for you.

Protect Documents in Motion

Ricoh Digital Rights Management Benefits

Complete Document Life-cycle Coverage

From the moment a file is created to when it is considered obsolete, protect it all the way due to file-level protection policies.

Network Transport Encryption

Protect your digital assets even in transit, no matter where they are.

Data Loss Prevention

Prevent the loss of any of your information due to security breach or human error.

Dynamic Permission Control

Customize user permission for documents based on required access clearance as per your requirements.

Persistent Protection

The defined policy of a file and/or document type controls who can access a file and what they can do with it.

More Enterprise Workflow Solutions

Ricoh Advanced Capture & Workflow

Paper documents and processes are slow, complex and expensive. Speed things up while saving time and money with Ricoh's Document Capture & Conversion processes. Whether on-premises or cloud-based, we will help you digitize your paper documents making them accessible, easily transportable and more secure.

Ricoh File Analysis & Migration

Find, process and move unstructured content; then scrub, sort and classify these files and documents to migrate them into an ECM. Maintain consistency in file classification and security of data / information.

Ricoh Enterprise Content Management

Not only is your ECM system a central information repository, but it can also be a processing hub for triggering pre-defined workflows. Route documents to ERP, accounting, compliance repos, approval chains and more.
