

Communication Services

RICOH
imagine. change.

Empower your workforce to collaborate anytime, anywhere.

Empowering Digital Workplaces

EMPOWER YOUR DIGITAL WORKPLACE USING A DYNAMIC COLLABORATIVE ENVIRONMENT

Ricoh improves workplaces using innovative technologies and services, enabling individuals to work smarter.

The workspace is transforming at a faster pace, as millennials join the labour force and the digital transformation fuels the need for companies to reinvent themselves.

Companies workspaces are adapting to new workstyles, like remote working, real-time collaboration across locations and the growing use of mobile devices.

Giving employees flexible, easy-to-use communications options will speed up information sharing, decision-making, and improve productivity. Remote collaboration removes the need for time spent in transit, allowing employees to focus on getting work done.

Remote collaboration helps enhance your organizations environmental footprint by reducing its reliance on travel for meetings and paper-based communications. It also demonstrates your commitment to the modern workstyle. Whatever the challenges of the organization, RICOH Communication Services can help:

From workflow to workspace, to workstyle.

Communicate, Collaborate & Learn

Connect, Collaborate & Learn by RICOH is a new way of working that brings together a suite of powerful communication services for organizations and educational institutions.

By understanding the need to communicate, collaborate and learn, RICOH has designed solutions that meet the needs of different verticals, from educational institutions to large corporations, construction & manufacturing and the hospitality industry.

You will have simple, streamlined solutions for all your different needs and sizes—tailored to your unique requirements and objectives. This includes the latest tools and services for communications such as video conferencing, collaboration rooms and other training and meeting needs.

Education

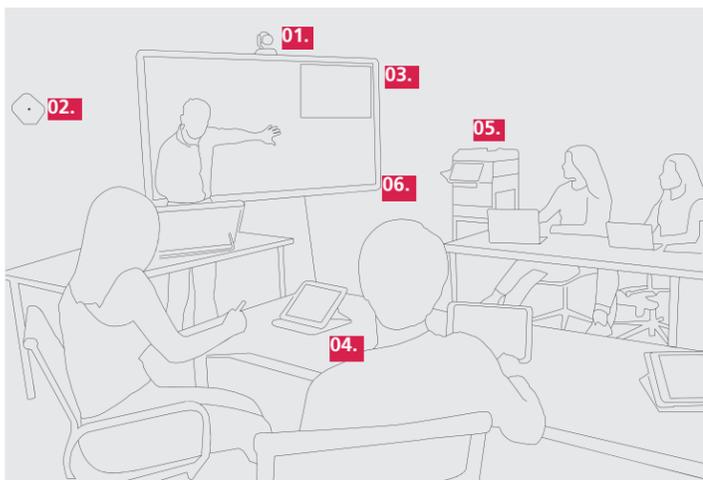

Intelligent Classroom

When technology meets learning.

The intelligent classroom is a concept where the space and the technology comes together to support new learning methods, such as the collaborative experience, the aligned content and the differentiated instruction. It's designed to integrate the content and technologies into a seamless solution that facilitates the visualization of content, promotes collaboration and enhances the learning experience.

A collaboration-driven classroom environment enables more engaged learning with projectors for multimedia content and presentation screening, combined with interactive displays with easy to use tablet-like functionalities that enable users to email or print directly from the screen. RICOH also integrates and enables cloud based architectures to manage and support all devices, including the students' own devices (BYOD).

Technologies

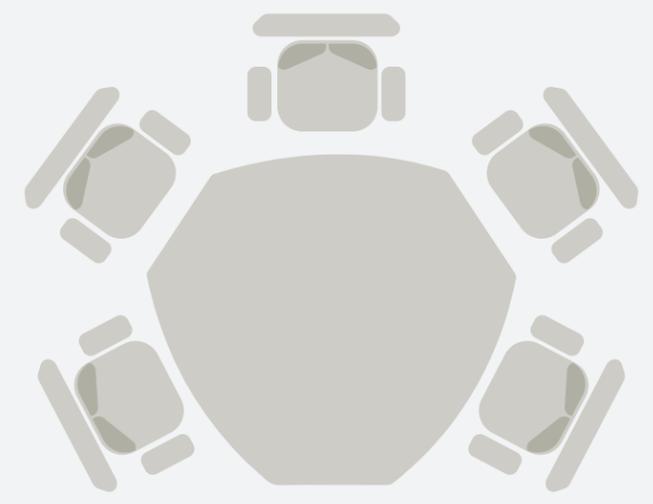

- 01. Videoconference
- 02. Content Access Point
- 03. Interactive Flat Panel Display (Whiteboard)
- 04. Wireless Projection
- 05. Multifunctional Printer
- 06. Cloud Infrastructure

Remote Learning

Create collaboration-driven classroom environments to enhance the learning experience in which students and faculties can interact with remote locations thru easy to use video conference technologies, allowing them to communicate and share images and files seamlessly.

Facilitate real-time collaboration across multiple locations.

Huddle Rooms

The new work style has evolved from formal and large conference rooms and long meetings towards brief and informal meetings in small spaces also called huddle rooms.

In the same way a team of football players huddle up to plan their next move, a huddle room is a strategically small meeting space designed to empower people to meet quickly and easily. These rooms typically accommodate up to five people to meet and collaborate dynamically.

At RICOH we take into account the spaces and dimensions available at different corporate facilities and whether the space is open or closed. We have designed different options for huddle rooms, with the right technology infrastructure to boost productivity to even higher levels:

Video Conferencing

Ultra-Short Throw Projector

Interactive Flat Panel Display

Hand Held Projector

Solution Offering

Interactive Flat Panel Displays

Our Interactive Flat Panel Displays encourage hands-on collaboration that is innovative, and engaging. Your team's efforts can be digitally displayed in high-quality, with this solution that is user-friendly, offers secure connectivity, and seamlessly integrates with your existing infrastructure / multiple platforms.

Details can be adjusted quickly, with ideas exchanged in real time. Ricoh's IFPDs become a total collaboration tool with video, audio, and data communication when paired with Ricoh's video conferencing.

Projectors

Ricoh offers a wide range of projectors that fit into any environment, allowing you to make a bigger impact using less space. Presentations can be customized for your audience, whether they occur in small meeting spaces, classrooms, auditoriums or beyond.

With Ricoh projectors, demonstrations, presentations, meetings, and lectures are managed quickly, effortlessly, with an element of interactivity, and a high resolution that displays extraordinary images, movies, and more.

Video Conferencing

You can stay more closely connected to your team, share high quality content, and encourage collaboration with a video conferencing system from Ricoh. Our easy-to-use video conferencing solutions help bring your team meetings, team projects, and training to life.

The Ricoh UCS Advanced video conferencing service allows external participants the choice of application and services they prefer to connect into a Virtual Meeting Room (VMR) through their mobile device, PC or Mac® computer, or traditional videoconferencing equipment/system.

The portable and light, all-in-one design of the unified communication system allows it to be easily integrated as part of your existing video conferencing system.

I CAN INTERACT WITH ANY CLOUD STORAGE: CLOUD / GOOGLE DRIVE, AND DROPBOX

WITH A SUPPORTED RICOH MFP, I CAN PRINT, SCAN, FAX, AND COPY

WITH AN INTERACTIVE FLAT PANEL , I CAN SEND A FILE TO IT, OR SAVE A FILE FROM IT

I CAN PROJECT CONTENT FROM A MOBILE DEVICE ON TO A SUPPORTED RICOH PROJECTOR

Smart Connector App / Mobile Enablement

With Ricoh's Smart Device Connector users can experience the next-generation style of work. You will appreciate the intuitive, user-friendly design with technology that enables your employees to share and collaborate across our Interactive Flat Panel, Projectors and Multifunction printer devices.
