

5 Questions to Know for an In Patient Stroke Alert and WHY!

Last Seen Normal/ Last
Known Well and/ or
Symptom Onset
-Are we thinking possible alteplase or an
NIR case?

Reason Patient Admitted?
-If it was GI Bleed, that may rule them
out!

Recent Procedures?
(open or laparoscopic)
-We cannot give someone alteplase who
just had open heart, so a quick synopsis is
helpful

Anticoagulants:
What?
When?
Dose?
Heparin Drip or just a daily injection,
details make a difference

Patient Weight in KG?
When taken?
Stated or Actual?
Was it at admission? Or greater than 24
hours?
