

SMARTHBCU HUB | CEBOT Broadband Research

# Maximizing the Economic Utility of Internet Access

Technology Based Economic Development

To Equitably Connect Minority Communities to Broadband Internet Access Service through University Partnerships with the Minority Technology Industry.

## Program Mission

[www.urntech.org](http://www.urntech.org)

### Bridging Digital Opportunities

# Urban Rural Network

Second Tuesdays - 1:00PM - 2:00PM EST

## SMART HBCU Cohort Initiative

Council Exchange Board of Trade (CEBOT)

SMART HUB Policy Discussion on the \$65 Billion NTIA Broadband Infrastructure dollars.

**Dear CEBOT Members and Community Stakeholders**

Welcome to the Urban Rural Network Technology Webinar Series

The Council Exchange Board of Trade (CEBOT) is a 501c6 trade association representing the common business interest of the minority technology industry, our stakeholder members and the communities they serve.

Over the past decade CEBOT has worked with the Historically Black Colleges and Universities (HBCU) ecosystem to develop a working strategy to penetrate the U.S. federal contracting system. This effort is structured as a technology based economic development effort, increasing revenues and develop unique partner capabilities between the minority tech industry, academia, government and the communities they serve.

CEBOT will convene a session the second Tuesday of each month from 1:00pm - 2:30PM EST. This event series will support the development of joint partnership proposals, contracts, grants and other agreements necessary to connect and fund broadband infrastructure in U.S. underserved communities.
