Demo Mode

Posted: Apr 30, 2018

Demo Mode is a newly added feature to the ROAMpayX application (including white-labeled apps), which allows users to demonstrate the full functionality of Ingenico's point-of-sale solution without being logged-in to a production environment. This allows for the full demonstration of end-end transaction processing using **production readers** and **actual credit cards** in a sandbox environment.

Please note: Demo Mode is only available on RPX 5.2 and above

For a detailed Demo Mode user guide, please click here.
