## How do I set a Custom Transaction ID?

Posted: Oct 30, 2018

A new optional field has been added to RPX in version 5.3.0 and above, known as **Custom Transaction ID.** This field allows clients to pass *even more* information when processing a transaction, which could be useful for creating invoices, customizing merchant IDs, etc. Please note, this feature already exists in the ROAMmerchant virtual terminal.

On the Review Order screen, click on the Add Transaction Information button.

Discount (0%)	\$0.00 >
Tax (0.0000%)	\$0.00 >
Total	\$2.00
Add Transaction Information	>

On the next screen, you'll be able to add more information to the transaction – including **Custom Transaction ID**. (Please note: only letters and numbers are allowed in this field. Special characters or spaces are not supported.)

No SIM	3:48 PM @	
$\times$	Add Transaction Information	
Ado	transaction information	
No	(200 characters left) manual line breaks, extended characters or extended symbols allowed.	
Add	I Invoice ID	
	(15 characters left) Only letters and numbers allowed. No spaces allowed.	
Add	d Custom Transaction ID	
	(20 characters left) Only letters, numbers and hyphen allowed. No spaces or special characters allowed.	
Ado	d to e-mail receipt
