

## Viewing Merchant and Submerchant List

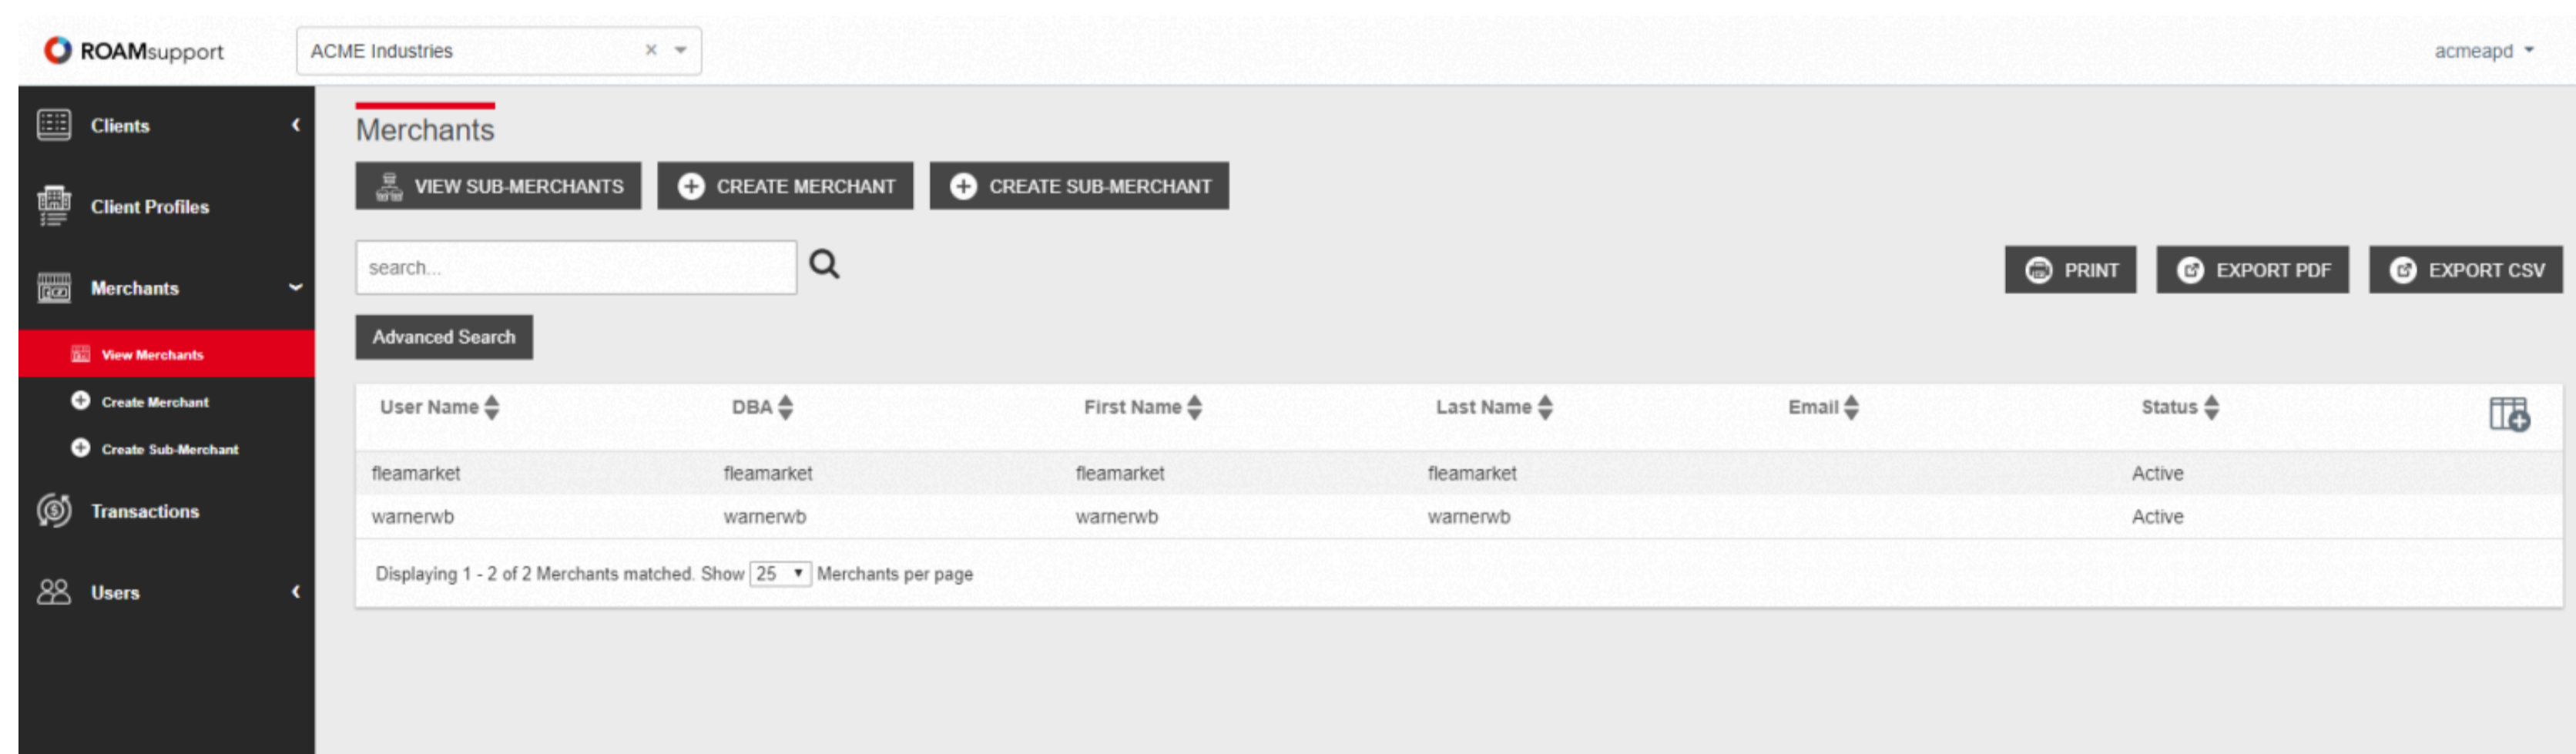

Posted: Nov 20, 2019

1. First, log in to ROAMsupport6 by following the steps outlined [here](#).
2. On the sidebar, open the **Merchants** menu.

3. Click on View Merchants, under the Merchants menu.

4. This screen is used to show details about the merchants associated with the logged-in client. It's important to note that profiles will not show up in the list by default, they must be searched. If you do not input a search query, a list of all associated client profiles will be returned.

5. This returns a comprehensive list of all merchants associated with the account. For a list of submerchants, click on the View Sub-Merchants tab.
