What is a MOBY/5500 Reader?

Posted: Jul 13, 2021

Moby/5500 offers merchants versatility and flexibility in creating frictionless checkout experiences for shoppers. Built to support both micro-merchants and retailers in designing checkout experiences catered to increasing shopper expectations, the Moby/5500 series accepts a variety of electronic payment methods, including EMV, magstripe and NFC/contactless, such as Apple Pay and Google Pay. By leveraging the connectivity of mobile devices, the Moby/5500 reduces cash management. It also has a variant available that is compliant with the PCI Council's SPOC Standard, to offer the capability of PIN on Mobile transactions.
