

Clean, fresh kitchens begin with InSinkErator

LEARN MORE

NOW WITH NEXT GEN TECHNOLOGY FOR **QUIET, POWERFUL AND EFFORTLESS PERFORMANCE**

INSIST ON INSINKERATOR

For over 80 years, InSinkErator has been the most trusted and relied upon name in food waste disposers for a good reason. We invented them.

Since 1938, we've led the way in responsible and efficient food waste management, proving that small, surprisingly simple, everyday actions can make a big difference.

Insist on InSinkErator to get the most from your kitchen. Commit to hygienic, sustainable and effortless food waste management.

For your home: A clean, fresh kitchen that helps reduce odour and bacteria.

For your community: Less food waste in local landfills.

For the planet: Sustainable practices that promote a healthier environment for all.

WHY INSTALL AN INSINKERATOR?

Easy to use, easy to install

InSinkErator food waste disposers are designed for simplicity, with a push-button operation that grinds food waste. Installation is quick, and its compact design fits neatly under most sinks, making it an effortless addition to any kitchen.

Works with composting or green bin programs

Pairing InSinkErator disposers with composting or green bin programs helps maximise diversion of food waste from landfill. It handles the scraps you can't compost in your garden at home, like bones and dairy, complementing your green efforts.

For your home: a cleaner, fresher kitchen

Commit to hygienic, sustainable and effortless food waste management.

INSINKERATOR IDEAL FOR ALL

Busy families and large households

Simplify clean-up in bustling kitchens by quickly disposing of food waste and reducing odours in your rubbish bins. With InSinkErator, you'll spend less time managing food waste and more time enjoying meals together.

Kitchen entertainers

Keep your kitchen guest-ready, with your InSinkErator effortlessly disposing of food waste in the background. Impress your guests with a spotless kitchen while spending less time cleaning and more time entertaining.

New home buyers

Upgrade your new home's kitchen with InSinkErator. Enjoy reliable and convenient food waste management. Begin your new home journey with a clean and sustainable kitchen from day one.

Home chefs/food lovers

Keep your kitchen spotless while effortlessly managing food scraps from fruit and veg, to meat scraps, dairy, bones and seafood. InSinkErator makes pre and post-cooking clean-up as easy as pushing a button.

Kitchen renovators

Transform your kitchen into a more convenient and cleaner space with InSinkErator. Easy to install and seamlessly integrated, a food waste disposer is the perfect upgrade for a cleaner, more sustainable kitchen.

FREQUENTLY ASKED QUESTIONS

HOW DOES AN
INSINKERATOR
WORK?

It's simple. After running cold water for a few seconds, turn the disposer on and feed the food scraps into the disposer. After grinding is complete, turn the disposer off. Leave the water running for another 10 seconds. The powerful grinding system quickly breaks down food waste into fine particles. No knives, no blades, no hassle.

HOW LONG
DOES IT TAKE
TO GRIND
FOOD WASTE?

Grinding food waste is a quick process. The disposer's sound changes when all food waste is ground into tiny particles. To keep your system running smoothly, let the water run for another 10 seconds to flush all ground food particles through the disposer.

IS AN
INSINKERATOR
SAFE?

Absolutely. Built to rigorous safety standards, InSinkErator disposers are designed for peace of mind. Unlike common myths, they don't use knives or blades, just powerful, precision-engineered grinding.

WHAT CAN AN
INSINKERATOR
HANDLE?

InSinkErator disposers are tough – capable of grinding meat scraps, pasta, fruit, veggies, eggshells and more.

DOES AN
INSINKERATOR
REPLACE
COMPOSTING?

No. Pairing your InSinkErator with composting or green bin programs helps maximise diversion of food waste from landfill. It handles the scraps you can't compost in your garden at home, like bones and dairy.

MultiGrind Technology

GrindShear Ring

Food waste material is ground into small particles along the surface of the ring.

Shearing Windows

Food waste is forced through a series of windows, shearing it into smaller pieces.

Undercutter Disk

After food particles pass through our GrindShear Ring they're processed by the undercutter disc component, which cuts them into even smaller particles to help prevent clogs.

Cleansing Paddle

The cleansing paddle helps rinse chamber walls clean of remaining residue.

ADVANCED SERIES: EVOLUTION PLUS 1000EC

SoundSeal Technology

Quiet Collar Sink Baffle

Baffle design causes running water to pool in the sink opening. The resulting thin "water dam" acts as a cap on the disposal and reduces the amount of noise that comes up through the sink opening.

Anti-Vibration Mount

An anti-vibration sink mount helps stop the transfer of noise and vibration from the disposer to the sink.

Sound Jacket

A custom-moulded insulation that surrounds the disposer to trap and muffle noise.

Anti-Vibration Tailpipe Coupler

Mounts the tailpipe in a cushion of rubber that helps reduce noise and vibration transferred from the disposer to downstream plumbing.

HOW TO USE YOUR INSINKERATOR FOOD WASTE DISPOSER

EASY. EFFICIENT. LOW MAINTENANCE.
FOLLOW THESE STEPS FOR HASSLE-FREE OPERATION.

- 1 Remove the sink stopper (if applicable).
 - 2 Turn on cold water - it can solidify fats, and assist with grinding. Never use warm water.
 - 3 Switch on the disposer and feed food scraps in gradually.
 - 4 Listen - grinding has finished once you hear the motor and water running.
 - 5 Turn off the disposer, but continue to let water run for 10 more seconds to help flush the disposer.
 - 6 For further freshness, grind ice cubes to help prevent odours and add lemon wedges for a clean scent.
- Do not use cleaning solvents, chemicals, grease, oil or fat. Do not attempt to grind oyster shells.**
