# CONTRACT MIGRATION

To increase the efficiency of contract management, we automate migration and standardize contracts into a centralized database. Intertec BPO contract services improve visibility and enable electronic compliance and renewal management by:

- Defining and assessing metadata and key reporting requirements (e.g., contract parties, contract dates, price and discounts, etc.)
- Building import templates
- Loading and testing contract data in development environment prior to going live in production
- Assistance with onboarding and training contract database users
- Weekly dashboard reporting

## OUR TEAM FOLLOWS A RIGOROUS PROCESS

For testing and loading suppliers to reach your goals of spend, PO's and invoices, as follows:

- Coordinate and train suppliers
- Develop and manage each suppliers enablement project plan
- Perform functional enablement
- Perform technical integration and testing

## SPEND DIAGNOSTICS

Detailed spend analysis is the foundation of a strategic sourcing initiative. We collect, cleanse and categorize spend data into meaningful commodity codes to identify opportunities. We also develop standard reporting structures with frequent data refreshes to enable category spend insights.

Intertec's robust spend analysis methodology is driven by our proven 6-step methodology including data enrichment, classification and category segmentation, that yields a detailed and visual review of your category spend data.

After our thorough review, we create an opportunity assessment for each spend category with a strategic sourcing wave plan based on four (4) critical factors:

- Savings/value
- Business need
- Risk/complexity
- Time-to-implement

# TECHNOLOGY

Procurement technology continues to evolve at a rapid pace and can present many challenges. We provide technology support through implementation, ongoing support and integration to your core systems including:

- Administrative support to configure system templates, manage users and data
- Support regional rollouts
- Regular data interface checks and uploads
- User customization
- New forms creation
- New Feature Demos and Implementations
- Build and support Integrations

Today's technology landscape can be overwhelming, and keeping up with all the new players is a full-time job, and that's where we come in.

## INTERTEC TECHNOLOGY ADVISORY TEAM

Understands the complexity of procurement technologies, and they use that experience to help you understand how a specific tool will help create sustainable value in your organization.
