

CAMPAIGN REPORT

2019 - 2023

INVEST  IVY TECH

THANK YOU FOR INVESTING IN IVY TECH'S STUDENTS

Your generosity and commitment to Ivy Tech inspires our college community, and the extent of our gratitude is difficult to express in a single message. Our alumni, our faculty and staff, our students, and our partners throughout Indiana have always been there for us during our 60 years of educating Hoosiers. But the results of our first 5-year, statewide campaign – Invest IN Ivy Tech – exceeded our imagination.

In 2018, we set an ambitious goal. We planned to raise \$285 million in our first comprehensive campaign that would support our students, enrich our communities, and impact our state. Thanks to your generous support and commitment, we raised \$340 million – 19 percent over our goal!

Your generosity is going to be felt for decades. Here are a just few ways donors like you are making an impact already:

- We have expanded our nursing program across Indiana to ensure health care facilities and patients have the support they need. IU Health committed our largest health care gift, \$8.75 million, that led to \$20 million raised across the state. Today, Ivy Tech produces more graduates with associate degrees in nursing than any college in the U.S.
- Our new \$15 million Lilly Scholars program funded by Eli Lilly and Company will create scholarships and learning opportunities for high school and college students with diverse backgrounds who intend to pursue careers in pharmaceutical manufacturing.
- We have opened new state-of-the-art facilities in Columbus, Kokomo, and Muncie helping us to recruit and train students who are ready to contribute to Indiana communities.

These efforts, and so many others, elevate our contributions across Indiana more than ever. That said, we cannot let up on our commitment to students. Checkered flags are a big deal in Indiana, but we don't use them in Higher Education. We are never done seeking out the next innovation or opportunity to support our students and communities. A wonderful example is Ivy+ Career Link -- the most comprehensive career coaching and employer engagement system in the nation that prepares students for careers in high-demand industries in Indiana. Emerging needs in a quickly evolving workforce environment will require strategies that ensure we're providing students and faculty with the tools they need. We are committed to delivering Higher Education at the *Speed of Life*.

Whether you contributed \$1 million or \$1, your generosity secures our vision for students who are helping Indiana succeed. We are proud to be part of this important Indiana institution that fills gaps in our workforce like no one else can, and we are excited to prepare the next generation of Hoosier students for our evolving workforce. From both of us – and all those across Indiana who have been a part of this campaign – thank you for believing in Ivy Tech and in our work on behalf of Hoosiers.

Dr. Sue Ellspermann,
President, Ivy Tech Community College

Courtney Roberts,
President, Ivy Tech Foundation

OUR IMPACT

\$150 MILLION

\$121 MILLION

\$42 MILLION

\$27 MILLION

OUR STUDENTS

Ivy Tech makes life better every day after graduation. Passions are unleashed, potentials are uncovered, and opportunities are discovered. Students – many of whom are the first in their families to attend college – are benefiting already from your generosity across our 19 campuses. Collectively, your contributions created 407 additional scholarships and millions in emergency aid – leading to opportunities that elevate the lives of students and the heartbeats of communities across Indiana.

OUR WORKFORCE

Ivy Tech contributes nearly \$4 billion annually to the state's economy and most of our students – more than 9 in 10 – stay in Indiana. They become nurses, manufacturing leaders, chefs, and pilots to help our communities, businesses, and economies to thrive. A talented workforce attracts new industries and entrepreneurs to the state, and we develop programs to meet workforce needs – including on-site certification programs for existing workers. Our Campaign supported workforce initiatives such as the new Garatoni School of Entrepreneurship and Innovation, nursing expansion and Industry 4.0.

OUR INFRASTRUCTURE

Students are successful when they have the tools to complement a powerful learning experience. New facilities – like those in Columbus, Kokomo, and Muncie – are homes to state-of-the-art programs including welding, nursing, health sciences, and automotive technology. These programs produce a real-world classroom environment. Students who feel engaged, committed, and prepared for new workforce experiences are more likely to succeed and make our communities stronger.

OUR FUTURE

Invest IN Ivy Tech was about our future: our students, our campuses, and our communities. Contributions to our Campaign came in many forms – including planned giving from those wishing to leave a legacy for years to come and unrestricted giving to meet the greatest needs of our students and campuses. These commitments will provide important opportunities for students and continue to impact future generations of Hoosier communities. The Campaign led to 167 planned gifts and \$27 million in unrestricted support.

OUR MISSION

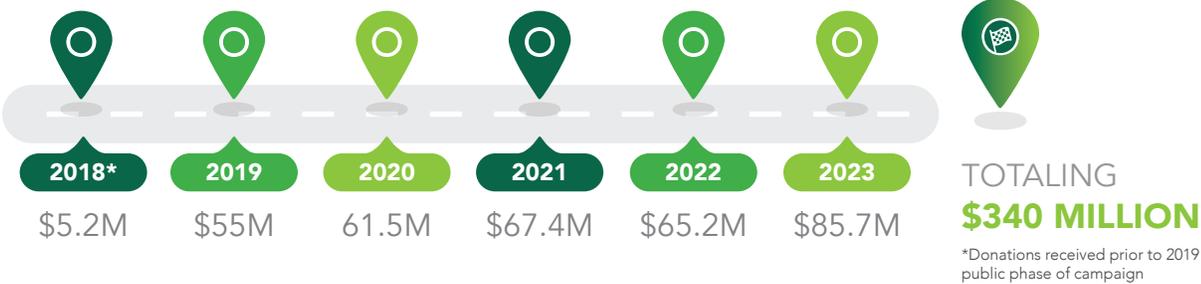

We build partnerships with diverse donors and leaders to generate resources and create opportunities for communities while breaking down barriers for students pursuing their education at Ivy Tech Community College.

OUR VISION

By revolutionizing philanthropy, we are a catalyst to generational change, we boldly impact communities, and fuel Indiana's economy.

STATEWIDE

\$98.7 MILLION

Nursing Expansion

Ivy Tech produces more graduates with associate degrees in nursing than any U.S. college. IU Health in 2022 gave the Ivy Tech Foundation its largest health care gift, \$8.75 million, supporting the expansion of faculty, equipment, and support services for students. Healthcare organizations in numerous communities such as Terre Haute and Evansville also contributed leading to \$20 million raised across the state.

Ivy+ Career Link

Ivy+ Career Link, funded by the Lilly Endowment, connects students, employers, alumni, and communities by providing career development services – including talent connection and training used by employers. By honing the skills of our students and Indiana’s workers, we are enhancing the opportunities of Hoosier companies and those in neighboring states. For students starting at Ivy Tech, it takes time and commitment to develop career goals, and Career Link focuses on the success of students and our communities.

Industry 4.0

Ivy Tech prepares next-generation employees for next-generation work through Industry 4.0, which allows machines and robots to connect in smart factories and systems – helping them to communicate with one

another and with people. Ivy Tech provides training and experiences for students through a process known as Smart Manufacturing and Digital Integration (SMDI). The experience leads to a better-prepared Indiana workforce, and the program is offered at several campuses across Indiana.

IvyCares

IvyCares helps students to connect with resources in numerous areas such as emergency transportation assistance, food security, mental health resources, technology assistance, and emergency aid funding. These resources aid students who sometimes have no other support and help them to continue their education. During the Covid-19 pandemic, student relief efforts raised \$1.2 million from 1,275 donors.

IvyAchieves

Ivy Achieves is a network of staff and faculty supporting new college students who are historically underrepresented in higher education. The program – funded by The Lilly Endowment – helps students to navigate college life and complete habits that will help them persist. Last year, 1,840 Ivy Achieves students from 10 campuses connected with Campus Leads who supported them with resources, activities, and guidance throughout their first year.

LAKE COUNTY

\$13.5 MILLION

Three Lake County locations focus on individual academic areas and achievement: East Chicago on trades, Crown Point on nursing and health sciences, and Gary on sciences. Our newly constructed welding lab in East Chicago allows students to get the hands-on experience needed to succeed. In fact, the lab features some of the most modern equipment in the industry. Long time relationships with donors resulted in scholarships for students in perpetuity. This funding will assist students in achieving their degrees potentially leading to future employment.

FORT WAYNE

\$21 MILLION

Ivy Tech Fort Wayne and Warsaw thrives on partnerships that support exciting new initiatives. With a focus on hands-on learning and career readiness, our campus is strengthening our community through high-quality education. The Questa Parkview Scholars Initiative, which provides 50 annual full cost-of-education scholarships to students graduating from a Fort Wayne Community Schools high school, is a shining example of an industry, community, and K12 partnership.

Campaign Highlights

- Increased Student Scholarships and Emergency Support services to include onsite childcare options.
- Established an Indiana Federation for Advanced Manufacturing Education Partnership which celebrated its first graduating class in May 2023. All recruits pursue an associate degree in Industrial Technology while working for a NEINFAME partner company. Students are provided paid work experience which allows them to graduate debt-free and begin an exciting career in just two years.
- One of seven colleges nationwide to receive a \$40,000 grant – sourced by General Motors – through the American Association of Community Colleges.
