

## Case Study

### How Swisslog delivers future-proof solutions by committing to supply chain sustainability

Swisslog is a world leading provider of data-driven and robotic solutions for logistics automation and as such, committed to setting new standards to deliver future-proof products to its customers. As a member of the KUKA Group, sustainability is anchored in the corporate culture of Swisslog and driven in all areas, including the supply chain. With the IntegrityNext solution, Swisslog ensures a sustainable supply chain, which in turn has a positive impact on the value chains of its customers such as Nestle and Coca Cola.

### Swisslog’s Supply Chain Sustainability Priorities

#### Set new standards

Swisslog is convinced that supply chain sustainability is key to delivering future-proof and energy-efficient solutions that set new standards for the industry.

#### Meet customer demands

Swisslog is committed to meet its customers needs in terms of CSR and sustainability, just like they expect sustainable practices of their own suppliers.

#### Integration & reporting

Swisslog wants to collect and analyse supply chain sustainability data and be able to disclose its efforts to its existing and prospective customers.

### How the IntegrityNext solution helps Swisslog

With IntegrityNext, Swisslog assesses their suppliers globally for sustainability - fully automated.

IntegrityNext enables Swisslog to make purchasing decisions based on harmonized supplier sustainability data.

The IntegrityNext solution digitizes Swisslog’s reporting process and integrates seamlessly into its business analytics tool Qlik.

### Achievements

→ 85% supplier response rate

→ 95% of top spend onboarded

→ Aggregation of global supplier data
