

See why **70% of K-8 US schools** have partnered with BrainPOP to keep students engaged during remote and hybrid learning.

Since March 2020, we've helped drive deep learning across the curriculum:

147 Million ACTIVITIES SUBMITTED

Including 2 million creative projects. Our activities and creative projects encourage agency by providing choice in how students demonstrate understanding while practicing critical thinking skills.

41 Million ASSESSMENTS COMPLETED

Which has helped inform 2.4 million differentiated assignments. Students need personalized support more than ever, and BrainPOP's auto-graded assessments and creative projects provide powerful data to strengthen your instruction.

136 Million MOVIES WATCHED

Our animated movies not only build core background knowledge—they also keep students excited about learning, which is more important than ever.

4 Million ELL ACTIVITIES COMPLETED

Ensure equity in learning for English learners too. BrainPOP ELL's scaffolded lessons and activities build strong vocabulary and comprehension skills.
