

Your dynamic and powerful teaching device for class, for home, for every day.

Enrich your teaching and enable productivity in and out of the classroom with sleek, portable Chromebooks.

Expand your versatility

Choose from a broad spectrum of capabilities, tools, and features to fit your teaching style.

Simplify class management

Bring all of your tools together in one secure place.

Enhance your productivity

Chromebooks are designed for efficiency, both in and out of the classroom.

“Teachers like the fact that Chromebooks don’t waste valuable instructional time. Teachers don’t have to wait for laptops to boot up or to download software, which means they can use every minute to teach students.”

– Frank Murray, Director of Instructional Technology, Wichita Falls ISD

55%

fewer unplanned outages

59%

less time spent on maintenance

76%

less frequent rebooting

73%

less time to reboot

Chromebooks are a different type of computer

What sets them apart is Chrome OS, the operating system on Chromebooks that runs in the cloud to create a secure, reliable machine with a user-friendly interface that updates itself.

Designed for choice

- Select from various models, including slates, flip screens, detachable keyboards, and more
- Optimize video conferencing, web browsing, and multi-tasking with the right level of computing power
- Choose features that fit your style such as touch screen, built-in front or rear camera, stylus, and more
- Customize your experience with Chrome OS settings like screen magnifiers, audio adjustments, or even screen readers.

Powerfully simple

- Collaborate easily with everyone in your school community working from the same interface
- Create assignments, edit photos or videos, grade, communicate, and manage personal tasks all on one device
- Edit, share, and organize your files securely in the cloud, without worrying about running out of storage space
- Stay more organized with virtual desktops to keep different work streams separate, such as school and personal tasks

Fast and reliable

- Lightning-fast boot-up times, rapid charging, and a long battery life
- Durable and repairable components, including spill-proof keyboards, scratch-resistant Gorilla Glass, and an average eight-year lifespan
- Built-in security and safe to use right out of the box, with no antivirus software required
- Offline mode for working on documents even without an internet connection

Powered by the cloud

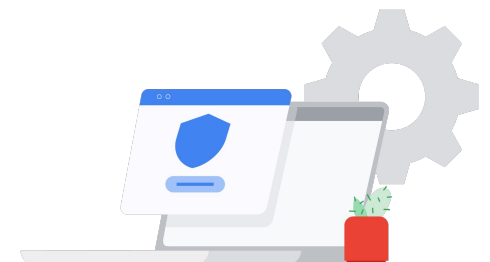

Chromebooks are built to perform well online. Automatic system and security updates and file backups let you focus on teaching without worrying about cyber attacks or running out of room on your device – because it's all kept and maintained in the cloud.

Security built in

With multilayered security, Chromebooks are designed to keep your files and data private and secure, without even having to install antivirus software.

There have been [no reported ransomware attacks](#) ever on any business, education, or consumer Chrome OS device.

Select a model that fits your teaching style

You can choose from a broad array of models to find your favorite type, level of power, or even a preferred manufacturer, including Acer, ASUS, Dell, HP, Lenovo, and Samsung.*

Educators can enjoy features such as:

- 8 GB or more of RAM
- Intel Core and AMD Ryzen processors
- 2-in-1, tablet, or laptop
- Touchscreen
- Built-in stylus
- High-resolution display
- Fingerprint sign-in
- 1080p webcam
- 12- to 14- inch screen
- Built-in front or rear camera

“Chromebooks are reducing the workload on the teachers, because instead of policing around looking at all different screens all the time, teachers have the ability to sit behind the desk and look at the overview a few times and then help individual students if there are individual problems.”

-Head of Computer Science, School System, Netherlands
