

# COVID -19 DISINFECTION CHEMISTRY

## THE CHEMETALL ADVANTAGE

### HIGHLY EFFECTIVE

Disinfectant and deep clean product based on the patented PerQuat® technology.

### EASE OF APPLICATION

Can be applied by a variety of equipment (ex: spray, foaming, manual applications etc.)

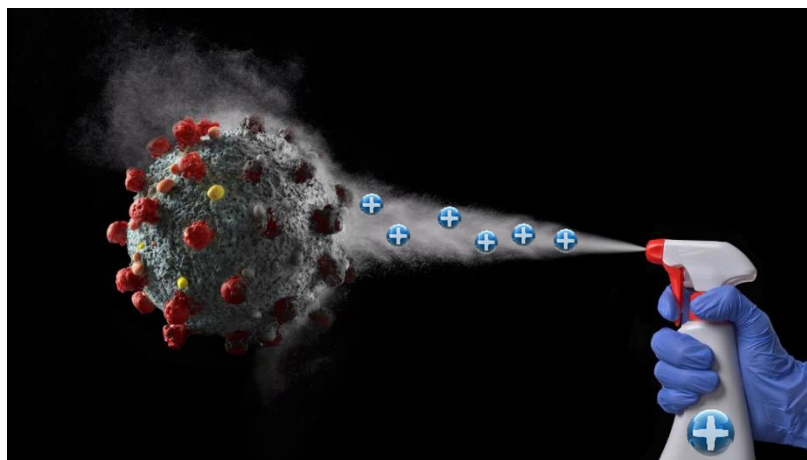

### HEALTH CANADA LISTED

Endorsed for use in combatting COVID-19, and carries an extensive label covering a wide variety of pathogens.

### LOW END USE COST

Concentrated product to allow for cost efficient use.

## Sterilex Ultra Kleen – Solution 1&2

**Sterilex Ultra-Kleen Solution 1 & 2**, based on PerQuat® technology, is a two-part liquid concentrate that is mixed together at time of use. The two-part chemistry is based on proprietary PerQuat® technology, with the unique ability to penetrate and target organisms that commonly form biofilms as well as on surfaces (such as *Listeria*, *Escherichia Coli* (*E. coli*), *Salmonella*, *Pseudomonas*), and remove organic contaminants.

Sterilex Ultra Kleen Solution 1 and Sterilex Ultra Kleen Solution 2 are Health Canada DIN registered products that are approved to penetrate and remove deep soils, disinfect, and sanitize when applied as directed.

Sterilex Ultra Kleen Solution 1 and Sterilex Ultra Kleen Solution 2 is used to deep clean hard to clean areas where there are potential harborage points for biofilm. The solution dries and has residual killing effect.

The product can be used on both food contact (with a potable water rinse) and non-food contact surfaces. Common applications include: floors, walls, drains and high touch areas. It can be applied using a variety of equipment (ex: spray, foaming, manual applications etc.)

Sterilex Ultra Kleen Solution 1 and Sterilex Ultra Kleen Solution 2 are less than ½ the user cost of typical ready-to-use products on the market today.
