BEACH SAND

THE URBAN ECO DIFFERENCE

Flip it your way with Australia's most affordable double-sided composite range. Our Urban Eco Collection features a different colour on either side – **perfect for smaller patios, balconies or a stunning makeover on a budget.**

Crafted from wood fibres and sustainably sourced materials, each board is shielded by a dual capped system with anti-slip technology and in-built fade resistance. Explore the possibilities with the most versatile board on the market. Available in 2.8m and 5.4m lengths.

ADVANTAGES OF URBN ECO DECKING MATERIAL

- Versatile colour choices
- Stunning Wood grain finishes
- Does not absorb heat, easy to walk on
- Anti-aging and UV resistant
- Easy to install, simple to maintain
- In-built fade resistance

URBAN ECO DECKING MATERIAL COMPARED TO OTHER CO-EXTRUSION MATERIALS

Our Urban Eco range combines next generation composite technology with a highly resilient capping system to produce a lightweight yet durable alternative to wood decking. Unlike other composites, these high quality materials will not rot, decay, warp, bend or splinter. Combined with BriteDeck's concealed fastening system, our Urban Eco range is the best choice for a sleek and low-maintenance surface.
