

FINEOS AdminSuite for Life, Accident and Health Insurers

FINEOS AdminSuite is the only modern, SaaS-based, customer-centric core platform purpose-built for the global life, accident, and health insurance industry. FINEOS AdminSuite delivers comprehensive support for group, individual and voluntary life insurance management on a single, integrated platform. It empowers insurers to manage quoting, policy administration, billing, claims, payments, and more, while also giving them the flexibility to launch compliant, hybrid benefit products that adapt to the evolving needs of today's workforce. From quote through claim, FINEOS AdminSuite helps global insurers modernise their business, adopt best practices, and deliver superior customer experiences, while also driving revenue growth and operational efficiency.

Accelerate Innovation

- Choose a single deployment or phased roll-out to suit your needs.
- Integrate seamlessly with existing systems using our component-based API structure.

Navigate with Ease

- Access consistent and accurate data across your organisation.
- Streamline operations using embedded AI-powered best practices and automated workflows.

Expand your Capabilities

- Modernise and streamline your operations with a comprehensive core system.
- Scale and expand your product offerings quickly and efficiently.
- Deliver personalised, responsive customer service.

FINEOS AdminSuite: The Modern Core Platform for Life, Accident and Health Insurers

FINEOS AdminSuite, powered by AWS, is the only comprehensive core system purpose-built for the Life, Accident, and Health Benefits market. Designed for automation, digital engagement, and actionable insights, FINEOS AdminSuite streamlines quoting, policy administration, billing, claims, and payments processes, empowering insurers to embed AI, optimise workflows and make smarter, faster decisions.

FINEOS AdminSuite Deliverables

Increased Customer Satisfaction

- Builds trust and loyalty through fewer service enquiries and errors.
- Accelerates responses to evolving customer expectations.
- Enables rapid implementation of innovative customer engagement technologies while accelerating the adoption of new business models and processes.
- Provides a single source of truth, enhancing consistency in communications.

Reduced Costs and Risks

- Automates and streamlines workflows and systems, reducing costs and frustration, and freeing up valuable time.
- Reduces redundancy in hardware, software, resources, and facilities.
- Offers pricing flexibility in a SaaS environment, improving cost predictability.
- Mitigates risk through automated regulatory compliance, embedded security, and a unified data archive.
- Future-proofs your technology, minimising the risk of obsolescence.

Empowered Transformation

- Offers an open core framework that enables seamless and faster legacy systems replacement.
- Accelerates the implementation of new products and features, aligned with strategic business priorities.
- Differentiates with embedded benefits configuration and automation across the suite.
- Empowers in-house resources to focus on high-value, strategic initiatives.
- Provides comprehensive, integrated APIs

The Industry Leading, Purpose-Built Platform for Life, Accident and Health

Cloud Native

FINEOS AdminSuite is a cloud-native core insurance platform built to deliver security, agility, and cost-effectiveness. By harnessing advanced cloud-native technologies, FINEOS AdminSuite provides a continuous delivery, always-on, SaaS digital services business model, ensuring seamless support for insurers.

Smart Automation and Role-based Model

FINEOS AdminSuite delivers the capabilities to leverage workflows, business rules, Artificial Intelligence (AI) tools, and embedded best practices to create a dynamic, fast, and satisfying user experience. Role-based models with pre-configured workflows and AI automation simplify decision-making, reduce complexity, ensure regulatory compliance, and provide seamless user experiences across multiple digital engagement platforms.

No Code / Low Code for Speed and Agility

Embedded in the FINEOS Platform are no code capabilities that enable change without needing to write code. Business experts can use these features to redesign products and business processes, create new forms, change business rules, automate correspondence, decision-making and workflows. The FINEOS Platform also supports low code extensions for customer specific requirements.

Integration and Extension

The FINEOS Platform contains a microservice extension architecture, allowing new or existing systems, calculators, business rules and other capabilities to be easily linked to change and extend core system behaviour. This means that any change required by the business can be implemented in a timely way without dependence on FINEOS.

Connecting Ecosystems with Flexible APIs

The FINEOS Platform is purpose-built for seamless integration within modern digital ecosystems, empowering insurers to connect effortlessly with enterprise portals, communication platforms, and third-party systems. Leveraging open APIs, the platform supports rapid deployment and digitisation across Group, Voluntary, and Individual lines of business, enabling insurers to deliver a unified, efficient, and connected customer experience.

Secure Scalability

FINEOS AdminSuite is pressure-tested to handle even the largest customer volumes securely. Its cloud-native architecture ensures compliance with SOC 2 and ISO 27001, featuring encryption, multi-factor authentication, and continuous threat monitoring. With proven scalability, it provides a resilient and secure solution for insurers.

FINEOS AI Optimisation

Embedded within FINEOS AdminSuite, our AI Optimisation engine delivers insights and intelligent task automation to reduce operational costs and increase customer satisfaction.

About FINEOS

FINEOS is a global software company providing modern customer-centric core software to the Employee Benefits and Life, Accident and Health industry , with 7 of the 10 largest group insurers in the U.S., 2 of the top 6 carriers in Canada, as well as a 70% market share of group insurance in Australia. The FINEOS Platform products include FINEOS AdminSuite, the industry leading, quote-to-claim, purpose-built, customer-centric product suite that enables group, voluntary and individual life, accident and health insurers to retire their outdated legacy systems. With employees and offices throughout the world, FINEOS continues to work with innovative, progressive insurers in North America, EMEA, and Asia Pacific.
