

chatchamp.io is looking for a

Junior Full-Stack Developer (m/f)

chatchamp

Do you want to work on the next generation marketing platform involving machine learning, NLP and chatbots? chatchamp is revolutionizing marketing with our automatized Messenger Marketing platform. We are a young and fast-moving startup with flat hierarchies and a focus on learning as we are working with a brand new technology.

Your role

- Take responsibility for the whole stack:
Design, develop, test, deploy, maintain and improve scalable software
- An appreciation for eye catching UI/UX
- Eager to learn new technologies

Our tech

- Scripting Languages Only 📝
- Microservice Architecture running on Node.js (ES6)
- Ruby on Rails and React in the Frontend
- Python for the Machine Learning Part
- PostgreSQL, Redis, AWS

Your profile

- First development experiences in at least one scripting language
- You work independently, are highly motivated, a fast learner and a problem solver
- Language skills: English (full professional proficiency)

Perks

- Flexible working hours, competitive salary and possibility of home office
- Book Flat Rate 📖 and Online Courses on a regular basis
- And of course Team Events, Unlimited Fruits and Bavarian Beer 🍺 (after work)

We look forward to your short and concise application, Please send us your CV or LinkedIn profile, together with earliest starting date, at jobs@chatchamp.io.

Let's Revolutionize Marketing Together!
