

### Digital and Streamlined Workflow Benefits of Dentrix Ascend Voice

- Simplifies the recording of perio results for the hygienist
- Allows for multiple concurrent users
- Helps improve infection control for staff and patients
- Improves overall speed and efficiency
- Integrates with existing Dentrix Ascend software
- Reduces costs for perio exams
- Helps educate patients
- Improves treatment acceptance

### Why choose Dentrix Ascend Voice?

Dentrix Ascend Voice can be your voice assistant with easy verbal recording of perio exam results and clinical notes.

Streamline perio exams by giving your hygienists an extra hand without the costs of extra staff. Reduce dentist workload by eliminating time spent on manual clinical note entry.

## DENTRIX ASCEND VOICE

Improve speed and efficiency with advanced AI technology

### HANDS-FREE AND ASSISTANT-FREE

Dentrix Ascend Voice saves valuable time for your hygienists and dentists. Using Bola AI, Dentrix Ascend Voice enables your providers to use advanced AI speech-to-text voice entry for perio exams and clinical notes. It reduces common needs for manual keyboard entry, allowing your providers to enter data hands-free and assistant-free.

And it couldn't be easier to set up — with a rapid install and no required configuration, it's ready to provide your practice with a streamlined, affordable method of voice entry. With its intuitive, easy-to-learn commands, your staff can be up and running the same day.

### FAST, ACCURATE AND COST-EFFECTIVE

Because Dentrix Ascend Voice is hands-free, hygienists don't have to enter perio scores manually during an exam or rely on an assistant in the operatory. Dentrix Ascend Voice also gives you a cost savings on the PPE and additional staff required by traditional methods, while educating and engaging patients as they hear their results. For dentists, hands-free entry can save tedious time spent typing out notes by dictating complete notes, whether in the office or at home.

When patients feel safer, they have greater confidence in your practice — which can increase patient retention and treatment. Dentrix Ascend Voice provides better outcomes for patients and staff alike

## BENEFITS

### Save Time

Eliminate time spent on manual entry across your practice by dictating perio results, clinical notes and more. And because of its near-perfect accuracy, your team won't have to spend time fixing the inevitable errors that come from manually entering data.

### Adopt Quickly and Easily

With its easy-to-learn commands, intuitive user interface, and seamless integration with Dentrix Ascend, Dentrix Ascend Voice takes minimal staff time to learn. Dentrix Ascend Voice requires no voice training or configuration, making it ready for a same-day start; the user-centric design of the perio tool allows hygienists to select their preferred workflow.

### Increase Safety

Reduce the risk of infection by eliminating the need to move back and forth between a patient's perio exam and manually recording the results. Lower your cost by saving on the PPE that would be required for admins to record data manually.

### Engage Patients in Their Oral Care

Provide patients the opportunity to hear their perio scores called out, educating them about their perio treatment and helping improve treatment acceptance.

### Streamline Office Administration

Reduce the amount of time your dentists, hygienists and front-office staff spend entering information by using voice entry functionality for your entire practice.

## KEY FEATURES

### REAL-TIME SYNC

Perio results are automatically recorded in the Dentrix Ascend perio chart. It also captures clinical notes dictated by a dentist or insurance and billing data spoken by your office staff — all while taking advantage of most speakers' natural 130-150 word per minute rate.

### OUTSTANDING SPEECH RECOGNITION

Dentrix Ascend Voice recognizes speech up to 99.9% accuracy. Because Dentrix Ascend Voice is programmed with a dental lexicon, it allows users to speak fully, giving you more complete notes.

### AUTOMATIC CALCULATIONS

The Perio Health Index (PHI) is calculated for each perio exam automatically, showing patients their results in an easy-to-understand format.

### RAPID INSTALLATIONS

In addition to quick staff adoption, Dentrix Ascend Voice is fast and easy to install.

### PRACTICE NOTES

Use voice entry to take clinical notes, add information to patient files, update insurance data and enter information for other essential office tasks.
